

## APPLICATION STAGES

### Method 1 (for smooth ceramic surfaces)

Clean dust and dirt on the area to be applied, then apply SikaCeram®-850 Design.

Use a metal ball stick to level the SikaCeram® 850-Design application.

Wait until the SikaCeram® 850-Design application results dry (± 8-12 hours)

Clean remaining SikaCeram® 850-Design application with a Shovel or Cutter.

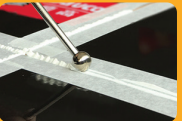

### Method 2 (for rough/textured ceramic surfaces)

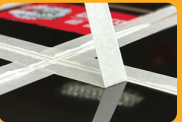

Apply paper tape to the application area to limit the gaps between the ceramic grout.

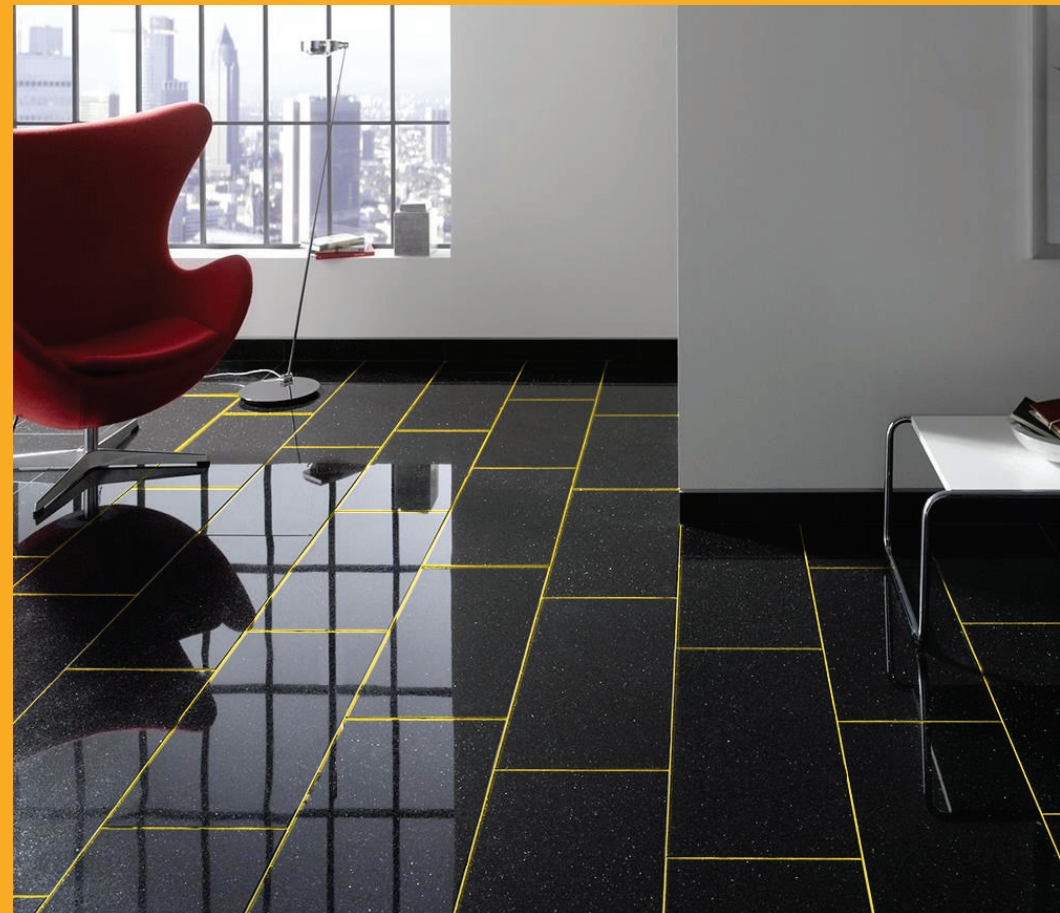

Apply SikaCeram® 850-Design to the areas between the ceramic grout gaps.

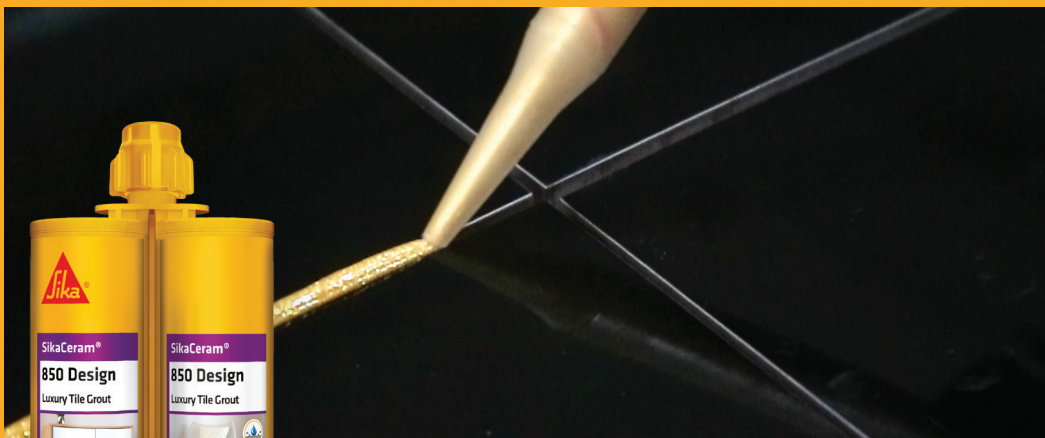

Use a metal ball stick to level the SikaCeram®-850 Design application.

Once the results are even, gently lift the sticky paper tape (before the SikaCeram®-850 Design dries).
