QUALITY STANDARDS

Our factory has all the quality standards including; ISO 9001, ISO 22000 and GMP. It is clear that pet health is what matters most to their owners, and proper nutrition is essential to achieve it, no one can ignore the beneficial impact of a healthy diet. We understand and care about how important pets are to our families. That's why we use only high-quality ingredients including natural white fish and chicken or lamb. With this in mind, our philosophy is simple, to create the best nutrition for cats and dogs.

Interest to the functional food is increasing all over the world which provides health benefits to the animal companions. Differentiation between functional foods and commercial cat & dog food is that besides providing nutritional needs of animals, they have also contained functional ingredients that beneficial to overall health.

As an example of functional ingredients, we can count a variety of herbs or herbal extract of them, hydrolyzed protein, glucosamine, chondroitin, collagen and omega-3 fatty acids. It is very important to apply functional contents into foods safely and functional. Also, using the right R&D process during production of foods is very essentials too. Scientific researches have been demonstrated that using functional contents on cat and dog feeding regularly and in the light of rules has the power to prevent many diseases before came up.

For Pronature Protect Range, we have specifically developed SP3D which helps pet animals to maximize the utilization of ingredients and increase immunity. By doing this, we help our pet companions to have a healthier and longer life with us.

Thanks to functional ingredients that we have been using in Pronature Protect Range, we believe that they will contribute general health conditions such as fights diseases by reinforces the immune system, supporting a healthy skin and coat, having healthy and stronger joint and bone structure, promote smooth and easy digestion and decrease plaque and bad breath.

Be able to briefly summarize the effects of the classified functional contents mechanisms that we used while we were creating SP3D:

Synox3D : Natural, standardized and GDO free blend of 134 synergistic herbal extracts which clinically proven to fight against the negative effects of free radicals. Some benefits of Synox3D is to protect cells from oxidative stress, delayed aging of cells and prevent from free radicals damaging of omega-3 fatty acids in the bloodstream. Thanks to the positive effects of Synox3D, our pet companions able to have a healthier immune system and prolonged lifespan.

Socotra3D : Clinically proven natural aloe vera extract accelerates the healing process by stimulating collagen synthesis. It has an anti-inflammatory effect and shows that effect by fighting against inflammation mediators. It increases phagocytic activity of monocyte and macrophage. It provides protection against oxidative stress by increasing the absorption of vitamins. Thanks to these positive effects, promotes pet companion healthy immune system, reduces the side effects of obesity, also helps the regeneration of skin and preservation of intestinal integrity.
