CUBEMAX RESOURCES (M) SDN.BHD.(1373408-X)

WHY YOU NEED TO MAINTAIN WATER TANK?

Basically you need to maintain your tanks regularly by calling our technical team to check your tanks to be properly inspected and cleaned periodically to help maintain good water quality supply with long life span of the tanks.

This is needed for every large water tank such as Pressed Steel and FRP Panel Water Tank. Therefore, regular tank inspections need to be carried out in order to identify small problems of tank leaking or minor defect before it may turn into serious conditions which causing tank bursting affecting to the human health and safety issues, eventually leads to major damages to the residence house, building and common areas to highly cost repairs due to premature tank failure. Tanks that are not periodically cleaned can cause contamination events that can harm human health or can contribute to customers' aesthetic complaints.
