

**TEUPEN**®  
*...work safely aloft*

# LEO 50 GT

The Greatest  
For all jobs up to 50 meters  
and long reach

# TEUPEN®

*...work safely aloft*

## LEO 50 GT

*The enormous lateral reach and flexible outrigger system are a great combination*

*With the patented height and width adjustable track chassis, slopes are a challenge this machine can handle*

*With the compact size and sensitive controls, even tight places can be reached*

*Also inside of buildings the machine operates safely and efficiently*

The LEO 50 GT - a machine that leaves no wish unfulfilled. A quick and effective solution for facility management, building construction, maintenance, repair of electric power transmission networks, and many more.

The LEO 50 GT has a long reach even at maximum working heights. Architects, construction engineers, building service contractors, and facility managers all benefit from the Teupen technology.
