

AdvanceGuard

SPAN 500 ADVANCE GUARDRAIL SYSTEM

INSTANT

QUALITY & STRENGTH YOU CAN TRUST

Key Features

1. Integral Advance GuardRail System

Instant AdvanceGuard is an integral part of the structure of the tower - and as such it is not possible to build the tower without them. By way of advance installation of the guardrails. Overcoming a major challenge when previously operators failed to build the safety rails on towers.

2. One Yousette Web - light and easy to handle

Provides operators collective protection and improves tower operators overall safety when working at height. With **FEWER COMPONENTS** in a one piece over the one-piece guardrail replaces 10 separate brackets for the operator the means less handling and increased speed of assembly.

3. Robustness Permissible Masses

The advance guardrail is designed in such a way that it cannot physically be removed by the operator while working on the working platform.

4. No-Grip - cold formed joints

The cold formed No-Grip joining process is a key feature of the Instant tower system and provides the extra strength and durability of traditional welded joints. NO Welding - no checking for cracks. 10 year no question warranty!

Instant AdvanceGuard is a new integral advance guardrail system that provides total fall prevention for the operator throughout assembly and dismantling of the tower.

In one versatile unit the lightweight AdvanceGuard improves the operators overall safety when working at heights. From the ground level up, the operator is ensured a safe and secure environment to carry out their work at height.

Suitable for all Instant Span 300 Towers with lengths of 2m, 2.5m and 3m.

Instant Span Towers features the unique high strength No-Grip joining system, guaranteed for 10 years.

All standard components have an extended 10 year warranty - on all EU manufactured parts only.

Instant Towers are compliant with EN1004 and Work at Height Directives, Load Class 3.
