0.9 Second

OPENING / CLOSING SPEED

Automate and secure your entrance in style

BR615T

INTELLI FAST BARRIER

✓ FASTER IS BETTER

Faster opening and closing allow more cars to pass through. This reduces congestion during peak hour.

✓ NEW DUAL SPRING PULL (DSP) SYSTEM

Arm weight is distributed evenly onto Dual-Spring-Pull system to achieve more balanced pulling force that allows smoother arm motion.

✓ NEW TELESCOPIC ARM

Inner smaller arm hidden inside the main arm can be pulled out to achieve desired length. Arm length can be reduced less than 3 meters for easier transportation by local truck, air or sea shipment.

✓ NEW FOAM LINING PROTECTION

Our new formula of foam lining is lighter, does not store water during rain and designed with sufficient hardness to effectively absorb collision impact force. Better protection without the extra weight burden to the motor.

2014 | IMPROVED TECHNOLOGY

New BR600 series modern gray contemporary outlook further reinforce the premium prestigious class of your home that will impress any visitors. BR600 is optimized to fit into more affordable budget with well balance features, performance and uncompromising reliability. Enjoy your lifestyle with higher security and convenient of MAG gate automation technology.

Every time you come home, you will feel safe and feel good looking at your stylish entrance.

“ MAKE YOUR HOME ENTRANCE LOOK GOOD AND SAFER AT MORE AFFORDABLE BUDGET...”

Feature

TECHNICAL SPECIFICATION

| DESCRIPTION | PARAMETERS |
|------------------------|--------------------------|
| Mechanical Temperature | - 40° To 75C |
| Electrical Temperature | -10° To 75C |
| Power Supply Input | 220V ± 10% AC, 50 / 60Hz |
| Power Consumption | 80 Watt |
| Relative Humidity | < 90% |
| Internal Lubrication | Grease |

✓ NO LIMIT SWITCH

Uses smart motor counter to auto detect open / close position for higher accuracy and better stability. Effectively reduced maintenance so that the barrier work longer and work harder for you.

✓ ARM AUTO REVERSE

Built in smart collision detection technology allows arm to auto reverse when hit with an obstacle during closing to prevent further scratches & dents on the vehicle.

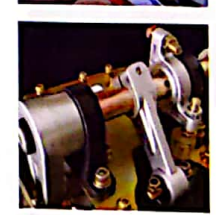

✓ ARM SWING OUT

Arm will swing out when hit directly by vehicle to avoid further damage on the vehicle.

✓ EUROPEAN LEVER DESIGN

European lever design ensure smooth opening arm and reliable consistent performance for years to come.

✓ EASY MANUAL RELEASE

In case of power failure, arm can be release manually using a special key from outside without opening up entire housing. This is to avoid internal system being tampered.

✓ FULL SPARE PART LOCALLY

No more waiting 1 or 2 months to import parts from oversea. All original spare parts are available from us locally that can make your barrier gate up and running in shortest time possible.
