# HS-173 Premium Triaxial Accelerometer AC acceleration output via 4 Core Polyolefin HFFR with Protective Conduit

- · Output via three axes
- For use with data collector
- · Resistant to oil

## Industries

Building services, Pulp and Paper, Mining, Metals, Utilities, Automotive, Water, Pharmaceutical

# **Technical Performance**

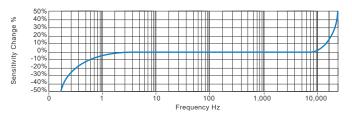

| Electrical             |  | Environmental           |   |
|------------------------|--|-------------------------|---|
|                        |  | Submersible Depth       | 328 ft. max (10 bar)                                |
| Transverse Sensitivity | Less than 5%                           | Mounting Threads        | see: 'How To Order' table                           |
| Range                  | see: 'How To Order' table              | Screened Cable          | Polyolefin HFFR - length to be specified with order |
| Isolation              | Base isolated                          | Standard Cable Length   | 16 ft.  |
|                        | 48cpm (0.8Hz) to 900kcpm (15kHz) ± 3dB | Maximum Cable Length    | 3,280 ft.   |
|                        | 90cpm (1.5Hz) to 720kcpm (12kHz) ± 10% |                         | 4 oz. (nominal) - Aluminium                         |
| Frequency Response     | 120cpm (2Hz) to 600kcpm (10kHz) ± 5%   | Weight                  | 8.3 oz. (nominal) - Stainless Steel                 |
|                        | Nominal 80Hz at 72°F per axies         | Mounting Bolt Provided  | see: 'How To Order' table x 1.2in long              |
| Sensitivity            | see: 'How To Order' table ±10%         | Mounting Torque         | 5.9ft. lbs  |
|                        | +3kHz for aluminium version            | Sensing Element/Constru | uction PZT/Shear                                    |
| Mounted Base Resonance | see 'How To Order' table (nominal)     | Case Material           | Stainless Steel unless specified Aluminium          |
|                        |  |                         |   |

| Electrical Noise | 0.1mg max                          |
|------------------|------------------------------------|
| Current Range    | 0.5mA to 8mA                       |
| Bias Voltage     | 10 - 12 Volts DC                   |
| Settling Time    | 1 second                           |
| Output Impedance | 200 Ohms max.                      |
| Case Isolation   | >10 <sup>8</sup> Ohms at 500 Volts |
|                  |                                    |

Mechanical

| Operating Temperature Range |
|-----------------------------|
| Sealing                     |
| Maximum Shock               |
| EMC                         |

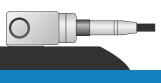

# Typical Frequency Response (at 100mV/g)

## Applications

Fans, Motors, Pumps, Compressors, Centrifuges, Conveyors, Air Handlers, Gearboxes, Rolls, Dryers, Presses, Cooling, VAC, Spindles, Machine Tooling, Process Equipment

Vibration sensor should be firmly fixed to a flat surface (spot face surface may be needed to be produced and cable anchored to sensor body.)

-67 to 266°F

EN61326-1:2013

IP68

5000g
