- Whatever 3.2mm, 4.0mm or 5.0mm diameter electrode, can be used casually.
- Hot start current adjustable, can fast ignite arc
- Arc force current adjustable, can effectively solve the small current sticky electrode.
- Equip with current and voltage meter, convenient for welding parameter monitoring.
- The standard with remote control socket, make it easy to adjust the welding current at long-distance.
- Wide range for input voltage (320-440V). Suitable for generator set.
- 200 meters and 35 square output cable; 4.0mm electrode can be 24 hours without interruption

Model	Input voltage/Phase/Frequency	Output current/Voltage/Duty cycle	Amps Input at Rated Output	Output range/OCV	Dimension	Weight
