

The high cost-performance,

## New ARC 200T

Excellent, Professional, Reliable and Rugged

- Use 100 KHz inverter COOL-MOSFET technology.
- With plastic corner, sloping front panel.
- Adopt new techniques that maximizing thermal dissipation with 4 separated heat sinks.
- Greatly improved the welding performance and stability; easy striking under low voltage.
- Intelligent protection: over-voltage, over-loading and over-heating.
- Auto-Adaptive arc force and hot start current.
- Anti-stick function built-in.
- VRD function built-in.
- Pass the high voltage 3750V AC dielectric strength test, safe for welder.
- Energy-efficient: power factor more than 0.7, efficiency more than 85%.
- Generator set okay.
- KJO-50 socket/plug, LED Display and machine appearance optional.

### Control panel

Simple and easy to operate, one rotary knob for welding current pre-set. Customers can easily choose the welding current, according to the display panel printing.

### Base Units Include

- 1 pcs inverter power source
- 2 pcs Euro plug(KJO-50)

### Optional

- Auto-Darkening Welding Helmet
- Stick electrode holder, 3.0m cable with Euro plug
- Earth clamp, 3.0m cable with Euro plug
