What We Do

At Anires Tech Sdn. Bhd., we provide advanced quality assurance and inspection solutions that help manufacturers improve product reliability, safety, and production efficiency.

Our core expertise lies in industrial leak testing systems, supporting industries where product integrity is critical – including automotive components, medical devices, electronics, and precision manufacturing. Our solutions help detect microscopic leaks, ensure sealing performance, and maintain strict quality standards before products reach the market.

We also specialize in high-precision measurement and metrology systems from VIEW Micro Metrology, enabling manufacturers to perform accurate dimensional inspection, automated optical measurement, and detailed quality verification. These systems are ideal for applications requiring tight tolerances, complex geometries, and repeatable measurement accuracy.

In addition, Anires Tech supplies industrial and security X-ray inspection systems for non-destructive testing and security screening. These systems support internal defect detection, assembly verification, and safety inspection across logistics, manufacturing, and high-security environments.

Beyond equipment supply, we deliver complete, end-to-end solutions – including consultation, system integration, installation, user training, and responsive after-sales technical support. We work closely with our customers to ensure each solution fits seamlessly into their production and operational processes.

At Anires Tech, our mission is to empower industries with reliable inspection technologies that enhance product quality, strengthen safety standards, and drive smarter manufacturing.

Home of Industrial Instruments & Equipments

1. Leak Test Specialist

- Differential Pressure Testing
- Pressure Decay Test
- Vacuum Testing
- Occlusion Testing
- Chamber Test
- Occlusion Test
- Burst Testing
- Functional Test

2. Leak Tester For Packaging

- Non-Destructive testing for
- Pharmaceuticals, Medical Devices and Food Packaging

3. Gas Leak Detector

- SF6 Gas Leak Detector - Q200
- SF6 Portable Multigas Analyser
- SF6 Gas Recovery Bag
- Helium leak bottle new / calibration

4. Eddy Current Testing

- Hardness Testing
- Flaw Detection
- Crack Detection

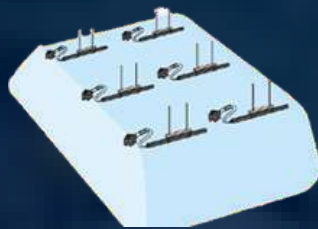

5. VIEW – Optical Metrology Systems

- Visual inspection
- Profile projector
- Measuring Microscope
- non-contact measurement systems

6. Anti-Static & Anti Dust Devices

- Dust Control (No wind)
- Static Control

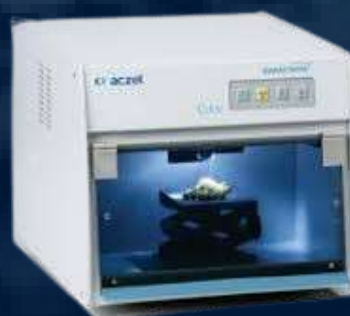

7. Precision Inspection Systems

- X-ray Inspection system
- JewelBox 90T
- JewelBox Ultra Compact

8. Coating Thickness Measurement

- X-ray Fluorescence
- Eddy current
- Magnetic Induction
- Hand-held
- Holiday Detector

9. Gold Check / Material Analysis

- X-ray Fluorescence
- Karat Analyzer
- Hand-held XRF

10. Calibration Standards

- Plated and Foils

11. Survey Meters

- Inspector / Ranger
- Monitor 4
- RAD 100
- Survey Meter Calibration

12. NDT Reference Standards, Eddy Current & Ultrasonic Tooling

- Probes
- Standards
- Transducers

13. Safeway Security Inspection

- X-ray baggage scanner
- Handheld metal detector
- Walk through metal detector

14. Crowcon Gas Detection

- Plated and FoilsSprint-Pro
- Gas Pro
- Xgard Bright
- AMG-800

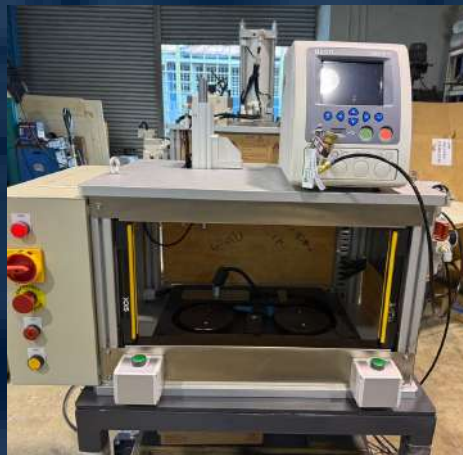

15. Pressure Measurement Film

- Low Pressure
- Ultra Low Pressure
- Extremely Low Pressure
- Micro Pressure

16. System Integration
