

Superior Clamping and Gripping

# **Product Information**

Universal gripper PZN-plus 380

Universal gripper

# Reliable. Robust. Flexible. Universal gripper PZN-plus

Universal 3-finger centric gripper with high gripping force and maximum moments due to multi-tooth guidance

# **Field of application**

multi- purpose thanks to a diverse range of accessories. Can also be used in fields of application with special requirements to the gripper (temperature, chemical resistance, dirt, and many more).

# Advantages – Your benefits

Robust multi-tooth guidance for precise handling

High maximum moments possible suitable for using long gripper fingers

Wedge-hook design for high power transmission and synchronized gripping

Air supply via hose-free direct connection or screw connections for flexible pressure supply in all automated systems

**Comprehensive sensor accessory program** for versatile querying possibilities and stroke position monitoring

Manifold options for special optimization for your specific case of application (dustproof, high-temperature, corrosion-protected, etc.)

Fastening at one gripper side in two screw directions for universal and flexible gripper assembly

Gripping force 255 .. 57300 N

Stroke per jaw 2 .. 45 mm

# **Functional description**

The piston is moved up and down by compressed air. The angled active surfaces of the wedge-hook produce a synchronized, centric jaw movement.

### 1 Housing

is weight-optimized due to the use of high-strength aluminum alloy

# ② Wedge-hook design

for high force transmission and centric gripping

### **③** Sensor system

Brackets for proximity switches and adjustable control cams in the housing

### (4) Multi-tooth guidance

precise gripping through base jaw guidance with a high load capacity and a minimum Play

# General notes about the series

**Operating principle:** Wedge-hook kinematics

Housing material: Aluminum alloy, anodized

Base jaw material: Steel

Actuation: pneumatic, with filtered compressed air as per ISO 8573-1:2010 [7:4:4].

Warranty: 36 months

**Scope of delivery:** Brackets for proximity switches, centering sleeves, O-rings for direct connection, assembly instructions (operating manual with declaration of incorporation is available online)

**Gripping force maintenance device:** possible by using the version with mechanical gripping force maintenance or pressure maintenance valve SDV-P

**Gripping force:** is the arithmetic sum of the individual force applied to each jaw at distance P (see illustration).

**Finger length:** is measured from the reference surface as the distance P in direction to the main axis. The maximum permissible finger length applies until the nominal operating pressure is achieved. With higher pressures, the finger length must be reduced proportionally to the nominal operating pressure.

**Repeat accuracy:** is defined as a distribution of the end Position for 100 consecutive strokes.

**Workpiece weight:** is calculated for force-fit gripping with a coefficient of static friction of 0.1 and a safety factor of 2 against workpiece slippage at acceleration due to gravity g. For form-fit or capture gripping, there are significantly higher permissible workpiece weights.

**Closing and opening times:** are purely the times that the base jaws or fingers are in motion. Valve switching times, hose fill times, or PLC reaction times are not included, and are to be considered when cycle times are calculated.

Cleanroom class ISO 14644-1:1999: 5

# **Application example**

Insertion tool for assembly of small to medium-sized axes. Due to the rotary feed-through, the axes can be rotated several times infinitely (> 360°) during the assembly process. Slip ring contacts integrated in the rotary feed-through reliably supply the gripper with power.

- Rotary feed-through DDF 2
- Quick-change system SWS
- **3**-finger centric gripper PZN-plus

For more information on these products can be found on the following product pages or at schunk.com.

# **Options and special information**

**Gripping force maintenance version AS/IS:** The mechanical gripping force maintenance version ensures minimum gripping force even in the event of a pressure drop. In the AS/S version this acts as a closing force, in the IS version as an opening force.

Anti-corrosion version K: for use in corrosion-inducing atmospheres

High-temperature version V/HT: for use in hot environments

Power booster version KVZ: if higher gripping forces are required

Dustproof version SD: absolutely dustproof, increased degree of protection against ingress of materials.

Precision version P: for the highest accuracy

ATEX version EX: for explosive environments

Additional versions: Various options can be combined with each other.

H1G compliant grease: for use in the food and pharmaceutical industries

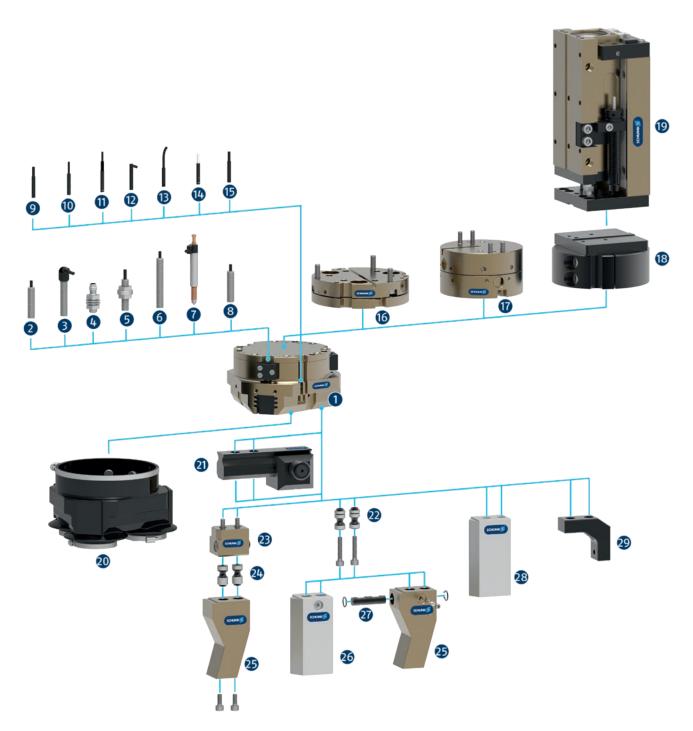

**NEW: H1 grease version H1G:** with H1 compliant lubrication as a solution for easy entry into medical technology, lab automation, the pharmaceutical industry and food industry

5

Universal gripper

# SCHUNK gripper PZN-plus

## **Overview Accessories**

# PZN-plus Universal gripper

### 1 PZN-plus

Universal 3-finger centric gripper with high gripping force and maximum moments due to multi-tooth guidance

### Sensor system

### 2 IN ...

Inductive proximity switch with molded cable and straight cable outlet

### 3 IN ...-SA

Inductive proximity switch with molded cable and laberal cable outlet

### () IN-C 80

Inductive proximity switch, directly pluggable

### 6 FPS

Flexible position sensor for monitoring up to five different, freely selectable positions

### 6 APS-Z80

Inductive position sensor for precise position detection of the gripper jaws with analog output

### APS-M1S

Mechanical measuring system for precise position detaction of the gripper jaw with analog output

### 8 RMS

Reed switch in round version

### 9 MMS 22

Magnetic switch with straight cable outlet for monitoring a position

### MMS 22-PI1

Magnetic switch with straight cable outlet for monitoring a freely programmable position

### MMS 22-PI2

Magnetic switch with straight cable outlet for monitoring two freely programmable position

### MMS 22-PI1-HD

MMS 22-Pl1 in robust design

### MMS 22-PI2-HD

MMS 22-PI2 in robust design

### MMS 22-SA

Magnetic switch with lateral cable outlet for monitoring a position

### MMS 22-PI1-SA

Magnetic switch with side cable outlet for monitoring a freely programmable position

### B MMS-P

Magnetic switch with straight cable outlet for monitoring two freely programmable position

### MMS 22-A

Analog magnetic switch with straight cable outlet for measuring the gripper jaw position with analog output and teach function

### B RMS 22

Reed switch for direct assembly in the C-slot

### **Complementary products**

### 🚯 TCU

Tolerance compensation unit for compensating small tolerances in the plane

### 🛈 AGE

Compensation unit for compensation of large tolerances along the X and Y axes

### ASG

Adapter plate for combining various automation components in the modular system

### CLM

Linear module with pneumatic drive and scope-free pre-loaded junction rollers

### 20 HUE

Sleeve for protection against dirt

### **Finger Accessories**

### UZB

The universal intermediate jaw allows fast tool-free and reliable plugging and shifting of top jaws at the gripper.

### BSWS-AR

Adapter coupling of jaw quick-change system for fast, manual change of top jaws

### BSWS-B

Locking mechanism of the jaw quick-change system for fast, manual exchange of top jaws

### BSWS-A

Adapter coupling of the jaw quick-change system for adaptation to the customized finger

### Customized fingers

### 26 BSWS-ABR

Finger blank made of aluminum with interface to the jaw quick-change system

### BSWS-SBR

Finger blank made of steel with interface to the jaw quick-change system

### BSWS-UR

Locking mechanism for the integration of the jaw quickchange system into customized fingers

### ABR/SBR

Finger blanks made of steel or aluminum with standardized screw connection diagram

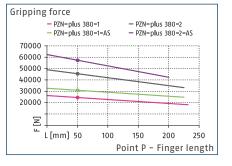

### 😰 ZBA

Intermediate jaws for reorientation of the mounting surface

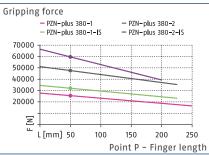

Universal gripper

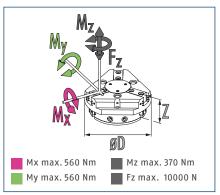

### Gripping force 0.D. gripping

### Gripping force I.D. gripping

### **Dimensions and maximum loads**

The indicated moments and forces are statical values, apply for each base jaw and may appear simultaneously. Loads may additionally occur to the moment produced by the gripping force itself.

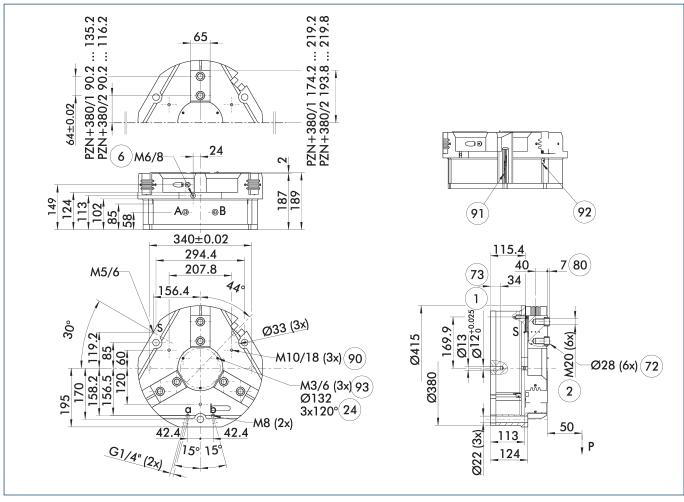

### **Technical data**

① It may take a few 100 gripping cycles until the full gripping force (as indicated in the data table) will be available.

# PZN-plus 380 Universal gripper

### Main view

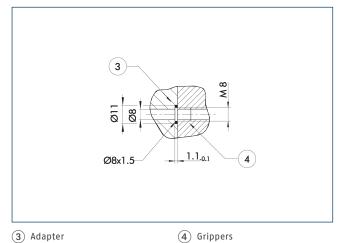

The drawing shows the gripper in the basic version with closed jaws, without dimensional consideration of the options described below.

- The SDV-P pressure maintenance valve can also be used for I.D. or O.D. gripping alternatively or in addition to the spring-loaded, mechanical gripping force maintenance device (see catalog section on accessories).
- A, a Main / direct connection, gripper opening
- B, b Main / direct connection, gripper closing
- S Air purge connection
- (1) Gripper connection
- (2) Finger connection
- (6) Lubricating nipple connection
- (24) Bolt circle

- (72) Fit for centering sleeves
- (73) Fit for centering pins
- 80 Depth of the centering sleeve hole in the counter part
- (90) Transport thread
- (91) Sensor MMS 22..
- 92 Sensor IN ...
- (93) Thread below the cover for fastening external attachments

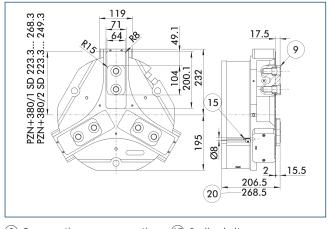

Universal gripper

### Hose-free direct connection M8

The direct connection is used for supplying compressed air without hoses. Instead, the pressure medium is fed through bore-holes in the mounting plate.

### **Dustproof version**

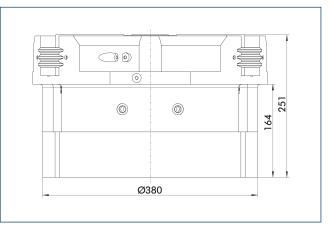

(9) For mounting screw connection diagram, see basic version

(15) Sealing bolt (20) For AS / IS version

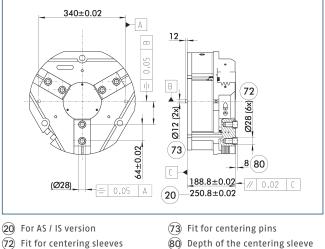

The "dustproof" option increases the degree of protection against penetrating substances. The assembly diagram shifts by the height of the intermediate jaw. The finger length is still measured from the upper edge of the gripper housing.

### Gripping force maintenance device AS / IS

The mechanical gripping force maintenance device ensures that a minimum clamping force will be applied even if there is a drop in pressure. This acts as closing force in the AS / S version, and as opening force in the IS version. Besides this, the gripping force maintenance device can be used to increase the gripping force or for single actuated gripping.

### **Precision version**

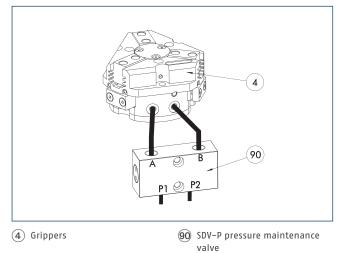

(80) Depth of the centering sleeve hole in the counter part

The indicated tolerances just refer to the variants of precision versions shown in the chart of technical specifications. All other variants of precision versions are available on request.

Universal gripper

### SDV-P pressure maintenance valve

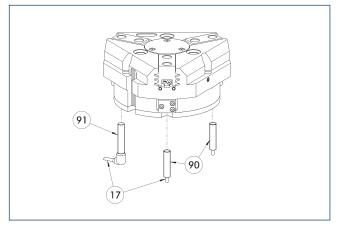

The SDV-P pressure maintenance valve ensures in emergency STOP situations that the pressure in the piston chamber of pneumatic gripper, swivel, linear, and quick-change modules is temporarily maintained.

Description	ID	Recommended hose diameter		
		[mm]		
Pressure maintenance valve with air bleed screw				
SDV-P 10-E	0300109	10		

In order to achieve the specified closing and opening time for each gripper variant, the recommended hose diameter must be used. The direct allocation of the respective variant of the gripper for the respective SDV-P can be found at schunk.com.

### **Inductive Proximity Switches**

### Programmable magnetic switch MMS 22-PI1

(17) Cable outlet

(91) Sensor MMS 22 ..- PI1-...- SA

(90) Sensor MMS 22 PI1-...

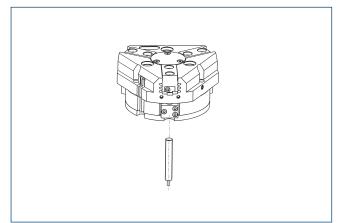

Position monitoring with two programmable positions per sensor and electronics built into the sensor. Can be programmed using MT magnetic teaching tool (included in the scope of delivery) or ST plug teaching tool (optional). End position monitoring for mounting in the C-slot. If the ST plug teaching tools are listed in the table provided, teaching is only possible with the ST teaching tools.

() When using an APS system, one mounting kit (AS-APS-Z80) and one APS-Z80 sensor is required per gripper. The resolution of the sensor can be lower in the peripheral areas of the gripper. You can find further information on the product in the operating manual.

### APS-M1 analog position sensor

(90) APS-M1S sensor

(92) APS-K extension cable

(91) APS-M1E electronic processor

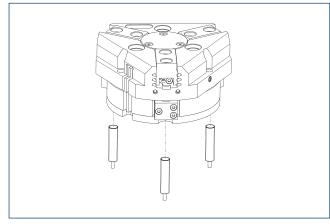

Analog multi position monitoring for any desired positions

Description	ID	
Mounting kit for APS-M1		
AS-APS-M1-PGZN-plus 200-1/380-2	0302085	
AS-APS-M1-PGZN-plus 380-1	0302090	
Analog position sensor		
APS-M1S	0302062	
Connection cables		
APS-K0200	0302066	
APS-K0700	0302068	
Evaluation electronics		
APS-M1E	0302064	

() When using an APS system, for each gripper an attachment kit (AS-APS-M1), an APS-M1S sensor (incl. 3 m cable) as well as an electronics (APS-M1e) are required. An extension cable (APS-K) can be connected between the sensor and the electronics as an option. The max. cable length between the sensor and the electronics is 10 m, between the electronics and their control unit (PLC) it is max. 1 m.

Universal gripper

### **Cylindrical reed switches**

End position monitoring can be mounted with an attachment kit.

Description	ID	
Attachment kit for proximity switch		
AS-RMS 80 PGN/PZN-plus 160-380	0377727	
Reed Switches		
RMS 80-S-M8	0377721	

Two sensors (closer/S) are required for each unit and extension cables are available as an option. This attachment kit needs to be ordered optionally as an accessory. Two mounting kits are required for each gripper. For sensor cables, note the minimum permissible bending radii. These are generally 35 mm.

15
