

Superior Clamping and Gripping

Product Information

Angular gripper SGW 64

SGW

Angular gripper

Light. Fast. Flexible.

Gripper for small components SGW

Small, simple pressurized plastic angular gripper with spring return

Field of application

Universal application in clean and slightly dirty environments, with special requirements on corrosion resistance and anti-static properties of the gripping unit

Advantages – Your benefits

Housing made of plastic Making the gripper extremely light and free from corrosion

One-way acting 3-fold piston with lever gear for high power transmission and synchronized gripping

Spring-loaded pressure piece for optional pressing and separating of workpieces

favorable in price especially suitable for low-budget applications

Sizes
Quantity: 3

Weight
0.05 .. 0.17 kg

Gripping moment
1.35 .. 7.45 Nm

Angle per jaw
8°

Workpiece weight
0.3 .. 1.3 kg

Functional description

The horizontally arranged pistons are pressed away from each other by compressed air.

The base jaws are opened at an angle and in a synchronized fashion by the bearing-mounted lever mechanism.

Reset is done by compression spring.

① **Base Jaw**
for the connection of workpiece-specific gripper fingers

② **Lever mechanism**
for precise and synchronized gripping

③ **Drive**
single-acting double piston system with spring return

④ **Housing**
weight-optimized due to the use of plastics

General notes about the series

Operating principle: one-way acting 3-fold piston with lever gear and spring reset

Housing material: Plastic with metal functional components

Base jaw material: Plastic

Actuation: pneumatic, with filtered compressed air as per ISO 8573-1:2010 [7:4:4].

Warranty: 24 months

Scope of delivery: Centering pins, O-rings for direct connection, assembly instructions (operating manual with declaration of incorporation is available online)

Gripping force maintenance device: not possible

Closing moment: is the arithmetic sum of the individual moment applied to each jaw.

Finger length: is measured from the reference surface as the distance P in direction to the main axis.

Repeat accuracy: is defined as a distribution of the end Position for 100 consecutive strokes.

Workpiece weight: is calculated for force-fit gripping with a coefficient of static friction of 0.1 and a safety factor of 2 against workpiece slippage at acceleration due to gravity g. For form-fit or capture gripping, there are significantly higher permissible workpiece weights.

Closing and opening times: are purely the times that the base jaws or fingers are in motion. Valve switching times, hose fill times, or PLC reaction times are not included, and are to be considered when cycle times are calculated.

Application example

Robot handling with gripper unit for loading and unloading of round plastic sleeves, are weight-optimized due to the use of plastic components.

SCHUNK offers more ...

The following components make the product even more productive – the suitable addition for the highest functionality, flexibility, reliability, and controlled production.

Pressure maintenance valve

Inductive proximity switches

① For more information on these products can be found on the following product pages or at schunk.com.

Options and special information

Due to the use of plastics, this gripper is characterized by a low weight.

Closing moment curve

Dimensions and maximum loads

ⓘ The indicated torques and forces are static values, apply for each base jaw, and may occur simultaneously.

Technical data

Description		SGW 64
ID		0305206
Opening angle per jaw	[°]	8
Closed angle per jaw up to	[°]	2
Closing moment	[Nm]	7.45
Weight	[kg]	0.17
Recommended workpiece weight	[kg]	1.3
Fluid consumption double stroke	[cm ³]	1.8
Min./nom./max. operating pressure	[bar]	4/6/7
Closing/opening time	[s]	0.02/0.03
Max. permissible finger length	[mm]	50
Max. permissible mass per finger	[kg]	0.07
IP protection class		20
Min./max. ambient temperature	[°C]	5/90
Repeat accuracy	[mm]	0.1
Dimensions $\varnothing D \times Z$	[mm]	64 x 44

Main view

The drawing shows the gripper in the basic version with closed jaws, without dimensional consideration of the options described below.

① The SDV-P pressure maintenance valve can be used as a gripping force maintenance device (see catalog section on accessories).

B, b Main / direct connection, gripper closing

① Gripper connection

② Finger connection

⑦③ Fit for centering pins

⑨① Sensor IN ...

Jaw design O.D. gripping

⑨① Support of the top jaws at the base jaw

⑨① Maximum finger width

⑨② Maximum supporting length

SGW 64

Angular gripper

Spring-loaded pressure piece

For spring-supported positioning of the workpiece against a stop after the gripper has opened. Especially developed for loading machines.
