

Superior Clamping and Gripping

## Product Information

Angular gripper PWG-plus 50

# PWG-plus

Angular gripper

## Reliable. Robust. Compact. Universal gripper PWG-plus

Robust 2-finger angular gripper with oval piston and bone drive

### Field of application

For universal use in clean and slightly dirty environments.

### Advantages – Your benefits

**Variable top jaw design** since grippers are available in jaw version, but also in finger version via intermediate jaws

**Gripping force maintenance device** for a high process reliability

**Stroke limitation while opening** optional available for confined spaces and short cycle times

**Can be used in tough environments** due to the gripper's sturdy set-up

Sizes  
Quantity: 8

Weight  
0.13 .. 13.6 kg

Gripping moment  
3.32 .. 1025 Nm

Angle per jaw

## Functional description

The kinematics transforms this vertical motion into a synchronous and rotatory gripping motion of the base jaws.

① **Base Jaw**  
for the connection of workpiece-specific gripper fingers

② **Housing**  
is weight-optimized due to the use of high-strength aluminum alloy

③ **Drive**  
pneumatic oval piston for maximum driving force

④ **Lever mechanism**  
for precise and synchronized gripping

## General notes about the series

**Operating principle:** force-guided lever gear

**Housing material:** Aluminum

**Base jaw material:** hard-anodized, high strength aluminum

**Actuation:** pneumatic, with filtered compressed air as per ISO 8573-1:2010 [7:4:4].

**Warranty:** 24 months

**Scope of delivery:** Centering elements, O-rings for direct connection, fixed throttle (for sizes 50-200), assembly instructions (operating manual with declaration of incorporation is available online)

**Gripping force maintenance device:** possible by using the version with mechanical gripping force maintenance or pressure maintenance valve SDV-P

**Closing moment:** is the arithmetic sum of the individual moment applied to each jaw.

The indicated closing moment will be reached at an opening angle of 0°. A detailed closing moment course depending on the opening angle can be taken out of the diagram "closing moment course".

**Finger length:** is measured from the reference surface as the distance P in direction to the main axis.

**Repeat accuracy:** is defined as a distribution of the end position for 100 consecutive strokes.

**Workpiece weight:** is calculated for force-fit gripping with a coefficient of static friction of 0.1 and a safety factor of 2 against workpiece slippage at acceleration due to gravity g. For form-fit or capture gripping, there are significantly higher permissible workpiece weights.

**Closing and opening times:** are purely the times that the base jaws or fingers are in motion. Valve switching times, hose fill times, or PLC reaction times are not included, and are to be considered when cycle times are calculated.

## Application example

Cross gantry for light to medium-weight components.

① Line gantry LPP, pneumatic

② 2-finger angular gripper PWG-plus

## SCHUNK offers more ...

The following components make the product even more productive – the suitable addition for the highest functionality, flexibility, reliability, and controlled production.

Compensation unit

Manual change system

Tolerance compensation unit

Pressure maintenance valve

Flexible position sensor

Magnetic switches

Inductive proximity switches

① For more information on these products can be found on the following product pages or at [schunk.com](http://schunk.com).

## Options and special information

**Gripping force maintenance version AS/IS:** The mechanical gripping force maintenance version ensures minimum gripping force even in the event of a pressure drop. In the AS/S version this acts as a closing force, in the IS version as an opening force.

**High-temperature version VHT:** for use in hot environments

**Power booster version KVZ:** if higher gripping forces are required

**Additional versions:** Various options can be combined with each other. Numerous additional options are also available – just tell us what your task is!

## Hose-free direct connection M3

③ Adapter

④ Grippers

The direct connection is used for supplying compressed air without hoses. Instead, the pressure medium is fed through bore-holes in the mounting plate.

## Gripping force maintenance device

The mechanical gripping force maintenance ensures that a minimum clamping force will be applied even in case of pressure drop. This acts as closing force in the AS version. Besides this, the gripping force maintenance can be used to increase gripping force or for single actuated gripping.

## Shaft support

The complete assembly group for handling of cranks and cam shafts can be supplied on request.

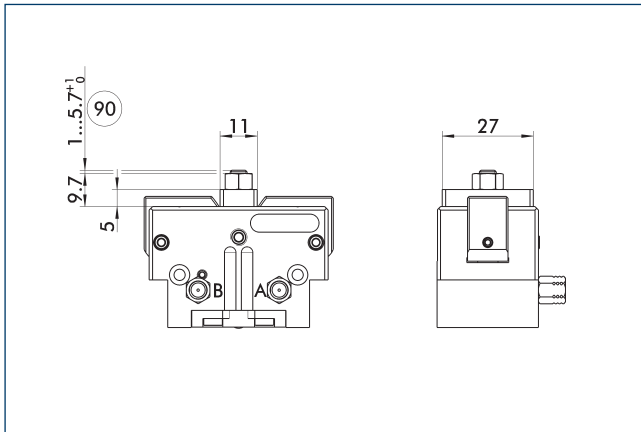

## Power booster version

⑨⑩ Applies to AS version

The KVZ cylinder increases the gripping forces during opening and closing. A second, in series-connected piston also increases the force on the wedge hook. Please consider that grippers which are equipped with a gripping force maintenance device are higher.

### Attachment kit for opening angle limitation

⑨⑩ Max. adjustment travel

Stepless adjustment of the opening angle is possible with an attachment kit.

### SDV-P pressure maintenance valve

④ Grippers

⑨⑩ SDV-P pressure maintenance valve

The SDV-P pressure maintenance valve ensures in emergency STOP situations that the pressure in the piston chamber of pneumatic gripper, swivel, linear, and quick-change modules is temporarily maintained.

① In order to achieve the specified closing and opening time for each gripper variant, the recommended hose diameter must be used. The direct allocation of the respective variant of the gripper for the respective SDV-P can be found at [schunk.com](http://schunk.com).

ZBA-L-plus 50 intermediate jaws

- ② Finger connection
- ⑤6 Included in the scope of delivery
- ⑦2 Fit for centering sleeves
- ⑧0 Depth of the centering sleeve hole in the counter part
- ⑧1 Not included in the scope of delivery

The optional ZBA-L-plus intermediate jaws allow the screw connection diagram of the top jaws to be rotated by 90°. This makes it easier to design and produce top jaws (particularly for long versions) because no deep through-bores are required.

Attachment valves

- ④ Grippers
- ⑨② Sensor distributor
- ⑨① Micro valves
- ⑨③ Y distributor
- ⑨① Sensor

The set of attachment valves reduces the compressed air consumption as there is no need to ventilate or bleed the supply lines. This can also reduce cycle time. The hose-free direct assembly of the micro valves reduces the hosing effort for the gripper. To further simplify electrical connection of the valves and sensors, their signals can be bundled via an optional distributor.

① A set of attachment valves ABV is required per actuator. The ABV set contains two 3/2 micro valves, an Y-distributor for compressed air supply and optionally a sensor distributor with two, four or eight inputs or outputs. Sensors for monitoring the gripper need to be ordered separately. Pneumatic hoses are not included in the scope of delivery.

Modular Assembly Automation

- ④ Grippers
- ⑨① ASG adapter plate
- ⑨① CLM/KLM/LM/ELP/ELM/ELS/HLM linear modules

Grippers and linear modules can be combined with standard adapter plates from the modular assembly system. For more information see our main catalog "Modular Assembly Automation".
