

Rotary Microtome

Features:

- * Large-volume removable waste tray on the top of housing, convenient to use.
- * Imported cross-roller guide rails and high precision screw motion mechanism.
- * Advanced high-precision micro-drive feed system enables stable and high-precision sectioning.
- * Small coarse-advance hand-wheel is close to the operator, in accordance with an ergonomic design.
- * The precise positioning system is not only easy to use, but also provides accurate X- and Y- axis adjustment.
- * Hand-wheel balance is precisely adjusted and locked at any position, ensuring safety and convenience of sectioning.
- * Fast switching between paraffin block clamp and cassette clamp; Paraffin Block Clamp is for Standard Configuration, cassette clam is optional.
- * Blade holder can be laterally moved without direct contact, enabling use of the entire length of the blade. (three different segments)
- * Cassette clamp can be locked at any position along each of the three axes, enabling easy adjustment of the specimen sectioning angle.
- * The red bar on the blade holder covers the whole length of blade to protect the user and enables easy changing of the blade.
