of appliances.

LIEBHERR

Refrigeration and freezing

EFL 4655

The very cool professional.

To achieve excellence in the food service industry, you have to consistently deliver outstanding quality. As does the Liebherr chest freezer. It proves itself around the clock with its reliability, efficiency and economy. High-performance components and high-quality materials guarantee its functional reliability and longevity. Well thought-out details make everyday life in the restaurant easier. Discover innovative cooling technology in a new design.

Perfect cooling performance for continuous use.

In a foodservice environment, chest freezers can be in use 24 hours a day. Working around the clock, they have to be extremely resilient and meet special requirements: a high storage volume taking up the smallest possible space, low energy consumption, as well as maximum flexibility in the choice of installation location and in how the chest is used, for example, also being used as an additional work surface. Our new generation of appliances has impressive features for the very highest demands in the food service industry.

A giver, not a taker.

With a Liebherr chest freezer, you are always well prepared for even the biggest rush of guests. Our appliances offer extra space for your supplies and everything that makes your customers happy. Removable baskets provide more orderly storage and easy access to your goods. Liebherr chest freezers for the food service sector also score points for their low running costs. Their outstanding energy efficiency and durability make our appliances an extremely economical and sustainable solution for high demands.

Frost
Protect

FrostProtect gives you greater flexibility on where you put your Liebherr freezer.

Whether in a hot kitchen or at low room temperatures in more remote corners – a chest freezer must always cool reliably. For this purpose, our appliances are equipped with FrostProtect and thus have a special low-temperature capability down to -15 °C. If the ambient temperature drops below 10 °C, they continue to work efficiently. This means you can put your Liebherr freezer wherever you like – even in unheated rooms such as a garage or cellar.

Versatile.

To create additional usable space, our new professional freezers are available with stainless steel tops on request. Optionally, the newly gained workplace can be raised to a back-friendly height of 92 cm with the aid of larger wheels. Whether larger or smaller wheels, our sturdy castors guarantee maximum flexibility and comfort: They make it easier for you to clean the floor underneath the appliance and simplify transport when you move your appliance. The recessed grip on the lid is unbreakable, hygienic and over the entire length making opening the lid easy from any position. The coated sheet steel interior ensures robustness that you will enjoy for a long time.

How you benefit, at a glance.

The easily **replaceable seal** in the chest lid ensures optimal hygiene, airtight closing and extends the service life of the chest.

Foamed-in skin-condenser in the outer surface for quiet and low-vibration operation.

The **sturdy chest lid** (stainless steel or white) can also be used as an additional work surface.

Full-length **ergonomic recessed grip** for convenient opening and closing.

No energy loss and optimum energy efficiency due to **highly effective insulation**.

No condensation on the housing and easy-to-clean outer surface for perfect hygiene.

Inner liner made of robust, coated sheet steel for increased durability and easy cleaning.

Optimum clarity thanks to **LED lighting** in the interior.

Sturdy castors make transport easier and allow you to clean the floor under the chest.

Secured against unauthorised access **by a robust lock**.

More orderly storage and flexibility in the distribution of the goods due to **sturdy mesh baskets**.

More energy efficiency and sustainability thanks to **natural and HFC-free refrigerant R 600a** in combination with powerful compressors.

Extremely robust, stable and torsion-free chest body, suitable even for very intensive loads.

Stop Frost

The ice-free interior means less frequent defrosting thanks to the **StopFrost system** and the door can be effortlessly opened and closed repeatedly due to the prevention of egative pressure.

Frost Protect

Maximum flexibility in the choice of installation location due to **an extended ambient temperature range from -15 °C to 43 °C**.

More storage safety due to the **analogue temperature display** with interior temperature indicator, accurate to the degree. Operating temperature adjustable from **-14 °C to -24 °C**.

EFL 6056

Quality is in the detail – good reasons for a new Liebherr chest freezer.

Robust design

Made for continuous use – and for generations of restaurateurs: From the inner liner made of coated sheet steel, to the powder-coated steel housing and the robust recessed handle, Liebherr chest freezers are impressively robust and durable.

Low energy consumption

High storage volume can be surprisingly economical: With their powerful compressors and highly effective insulation, Liebherr chests guarantee the best energy efficiency with maximum usable capacity.

Stainless steel top

Additional work surface included: The optional stainless steel top means that your new Liebherr chest can also be used as a worktop at any time.

Robust lock

To protect valuable goods: To keep the valuables in your chest freezer safe from unauthorised access, each unit has a sturdy lock.

FrostProtect

Reliable freshness, wherever you need it: Thanks to FrostProtect, all Liebherr chest freezers have a special low-temperature capability and can be used at ambient temperatures from -15 °C to 43 °C.

LED lighting

Perfect illumination: In the spacious freezer compartment, in addition to the practical organisation systems, the high-quality LED lighting ensures that the stored goods are more clearly arranged.

Replaceable seal

Energy efficiency that can always be renewed: An easily replaceable seal ensures the continuous insulation of the chest and thus low energy consumption. Damaged seals are replaced quickly and easily – and loss of cold air is avoided.

Sturdy castors

For more comfort and flexibility: Castors allow you to move your Liebherr chest easily and ensure ease of cleaning underneath the freezer. With the optional larger wheels, you have the option to raise your chest freezer to a height of 92 cm – which is particularly advantageous when used as an additional work surface.
