

RoHA CE iso9001

MMA Inverter DC welding machine

## Main features

- \* Single-phase, portable, fan-cooler, thermostatic protection, movable welding cable.
- \* Adopt with advance IGBT inverter technology, lightweight, accord with EMC standard.
- \* Compact, portable, highly effective, low consumption, energy saving.
- \* With strong compensation capability, resistant to voltage fluctuation, stable welding current.
- \* Hot start, arc force, overload protection.
- \* With complete accessories electrode holder, earth clamp, welding cable, brush/hammer, protective mask, carton box.
- \* Can weld for long time without stop.

## Technical data

MODEL	MMA 165
Reted Input Voltage (V)	220
No-load Voltage (V)	80
Current Range (A)	20 ~165
Rated Duty Cycle (%)	60
Input Capacity (KVA)	5
Class Of Insulation	H
Applied Welding Rod (mm)	2.0 -3.2
Weight (kg)	3.6
Packing Dimension (mm)	300x165x245
