

TO-1000

Torch Applied Bituminous Waterproofing Membrane

Obaproof TO-1000 is a high strength pre-fabricated torch on type waterproofing membrane.

There are 2 types: mineral and sand finishing surface.

- For mineral type can be apply for expose and trafficable, suitable for re-waterproofing and new RC concrete as well.
- For sand type, usually need to apply a protective screed, suitable to apply on new RC surface.

Uses:

- Used as waterproofing membrane on flat or pitched roofs (as an exposed or concealed system), foundations and basements, terraces and balconies, cut and cover tunnels, subways.
- Can be applied in single layer layer or in multi layer applications.

Characteristic & Advantages:

- Excellent stability when exposed to stresses such as movement and temperature extremes.
- Reinforced polyester allows the sheet to be flexible, durable and resistant to heat, aging and puncture.
- Uniform thickness of 3/4mm.
- Easily installed using flame torch methods.
- Good chemical resistance.
- Water and vapour proof.

Advantage:

- Standard thickness
- Exposable to uv
- Trafficable
- High tensile strenght
- Puncture resistant
- Good bonding
- Best for maintainance work

Application area

- Kitchen area
- RC flat roof
- Balcony
- Car porch roof
- Driveway
- RC gutter
- Planter box
- Toilet / Bathroom
