COMPLETE ORAL CARE

new

ADD A BOOST⁺

TO YOUR DAILY ORAL CARE

SENSODYNE

COMPLETE PROTECTION+

* Superior Cleaning Action vs a regular Sensodyne toothpaste

Looking for Sensitivity Protection+ All-in-One Daily Oral Care?

Many people have sensitive teeth, due to the underlying dentine being exposed when enamel is worn away or when gums recede. This means that triggers such as cold and hot drinks or food can activate nerves, deep inside the tooth, causing pain.

Tooth sensitivity is common, and your dentist/hygienist understands how it can affect your quality of life in many little ways. They can provide tips and recommendations such as using a toothpaste designed for sensitive teeth to address it, rather than just live with it. This can mean you can start to forget about sensitivity and go back to enjoying those ice cold or hot foods without thinking twice about it.

Sensodyne Complete Protection+ works by soothing nerves inside the tooth to help relieve sensitivity and help prevent it from coming back.*

*with twice daily brushing

Caring for your sensitive teeth shouldn't come at the expense of other important benefits.

Sensodyne Complete Protection+ provides multiple oral care benefits together with clinically proven sensitivity protection.

All-in-One Protection:
