

This is a reference guide for operating the ProDIGITAL line of handhelds. Refer to the User Manual for more information.

## Setting Up

---

 Charge the battery by connecting the handheld to an AC power supply or USB connector using the micro USB cable. Ensure all components are dry when charging. A full charge takes approximately 9 hours.

 Make sure the **date/time** is correct and set the **logging mode** (Single or Continuous).

 Setup sensor parameters and select **units displayed** on the Run and Data View screens.

 **Calibrate sensors** prior to taking measurements; sensor-specific calibration instructions can be found in the User Manual.

## Taking Measurements

---

 Insert the probe into the sample and briefly move it up and down to release any air bubbles. Allow measurements to stabilize and press the Enter key to **log data**. To stop Continuous logging, simply press the Enter key again.

## Data Management

---

 Press the File key to **view, delete, or backup** logged data. Data can be filtered by date/time and by the user-created Site and/or Data ID.

 Transfer data to your PC using **KorDSS Software**. Make sure the instrument driver and software are installed from the included USB flash drive or from **YSI.com**.

1. Open KorDSS Software.
2. Use the micro USB cable to connect the handheld to the PC.
3. Power on the handheld; there may be a short delay before it shows up in the software.
4. Select the handheld under the **Instrument Connection Panel** and click Connect.
5. Click **Start Download from Device**.
6. After data download, click **View Logged Data** to view, print, and export data files from KorDSS.
