

# THE WOOD PLACE

Working with Wood & More!

## ABOUT US

We embarked on our woodworking journey as mere hobbyists before we started our humble workshop, and we're excited to see what lies ahead for us on this road.

We hope to encourage more people to start their own DIY/woodworking journey by lowering the "entry barrier" with our **Build Together** workshops.

Follow us on our journey as we explore building with wood & other materials!

# ABOUT US

## MISSION

To be a platform for everyone to learn more about woodworking & other crafts.

## VISION

To encourage development of hard skills & craftsmanship by lowering the entry-barrier to woodworking & more.

## VALUES

- Learning
- Passion
- Open-Mindedness
- Teamwork

A photograph of a workshop table covered with various tools and materials. In the foreground, there are two yellow containers of wood glue, a brown coffee cup, a yellow hard hat, and a white plastic container. In the middle ground, there are several power drills, a hammer, a mallet, a wrench, and a tape measure. In the background, there are more power tools and containers. The text "CLASSES/ PRODUCTS" is overlaid in white on the left side of the image.

# CLASSES/ PRODUCTS

## CAT TREE – RM335

- Building cat tree with solid wood +
- Preparing & installing large pine dowels +
- Trimmer, routing & sanding +
- Natural, pet-safe finish +

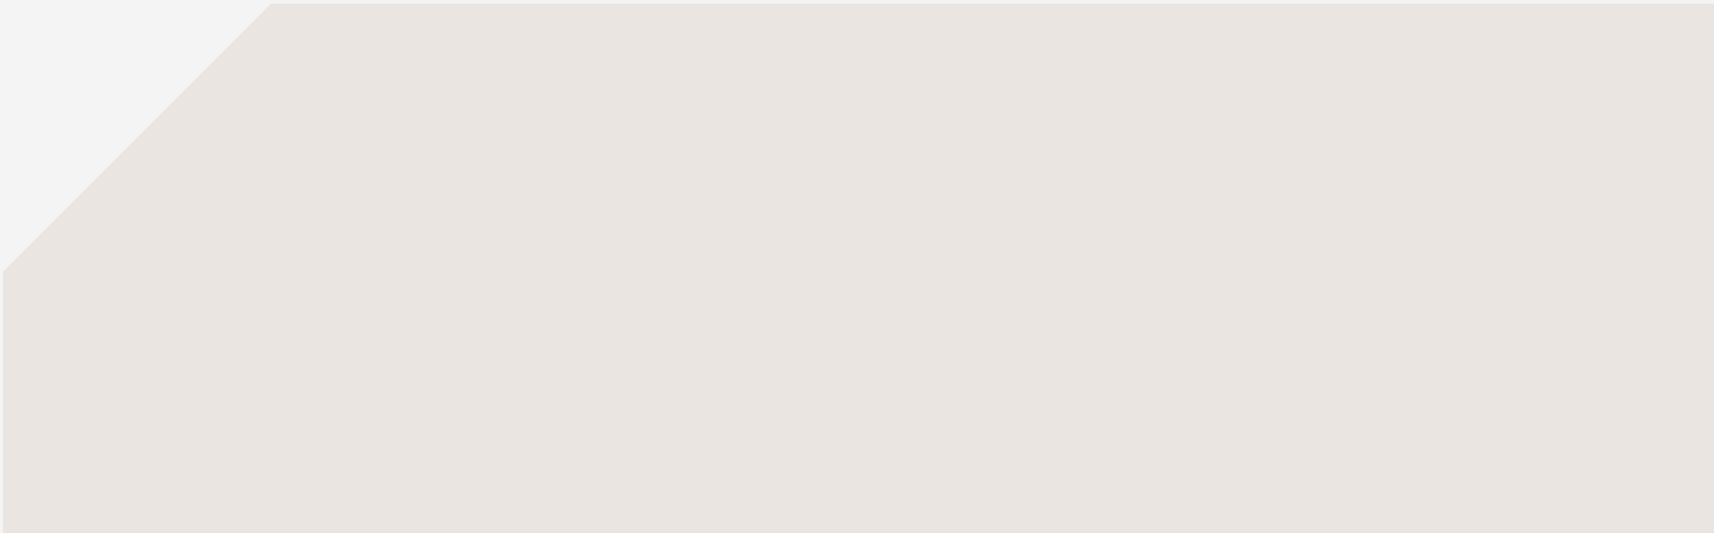

CUSTOM  
BUILD CLASSES

# Wanna build something else but don't know where to start?

Get in touch for a  
customized class!

# CUSTOM CLASS

## #1 Suresh's TV Cabinet

*Moving to a new home usually means needing new furniture. In Suresh's case, he wanted to make his very own signature piece.*

*He designed a TV cabinet (using PowerPoint!) & we did our best to help him turn that slide into reality!*

# CUSTOM CLASS

## #2 Preisha's Mini Terrarium Table

*Preisha first came to our workshop to make a coffee table, and later on asked if she could rent our space to finish her high school project.*

*After attending an induction course, she managed to handle power tools independently and completed her oval-shaped mini terrarium.*

# CUSTOM CLASS

## #3 Azrene's Cat Tower

*It's the school holidays & Azrene wanted to create some memories with her kids. They decided to build a large cat tower for their cats (one of which is a really large Maine Coon!) to jump, climb & rest.*

*Our team started designing & came up with a free-form, fluted cat tower for the class. They got to draw their own shapes for the platform & cat entrance, making their one-and-only cat tower.*
