

Types and Features of Aerial Cam Unit

SUCD Compact Type For Pierce

P.579~614

- Compact design with the mounting width of 52 mm and the shut height of 125 mm.
- Automatic alignment mechanism of the V-shaped guide.
- Available angle is 0° to 80° at increments of 5°.

Working Force kN(tonf)	
Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
14.7 (1.5)	29.4 (3.0)

SACD Compact Type For Pierce Working Force 3tonf

P.639~666

- Mount width is 52mm.
- The spring force is about 3.0 times as long as the same model's travel.
A little less than 10% of the piercing force is achieved. It is most suitable for piercing of high strength steel and thick steel.
Automatic alignment mechanism of the V-shaped guide.
- Available angle is 0° to 60° at increments of 5°.

Working Force kN(tonf)	
Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
29.4 (3.0)	58.8 (6.0)

SLSD Long Travel Type For Pierce

P.615~638

- The travel is about 1.5 times as long as the same model's (SUCD) travel.
- Compact design with the mounting width of 52 mm and the shut height of 135 mm.
- Automatic alignment mechanism of the V-shaped guide.
- Available angle is 0° to 50° at increments of 5°.
- ISO springs are used.

Working Force kN(tonf)	
Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
14.7 (1.5)	29.4 (3.0)

SULNC Long Nose Type For Pierce

P.667~682

- Mount width is 65 mm.
- In addition to a long nose (protrusion by 70 mm longer for the standard type than normal product), further protrusion of 150 mm (SC option) is available.
- Automatic alignment mechanism of the V-shaped guide.
- Available angle is 0° to 25° at increments of 5°.

Working Force kN(tonf)	
Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
14.7 (1.5)	29.4 (3.0)

HUCTF For thick metal pierce reinforced return force type

P.683~716

- Strong type with spring force of about 6000 N-600 kgf.
It is most suitable for piercing of high strength steel and thick steel.
- Automatic alignment mechanism of the V-shaped guide.
- Available angle is 0° to 75° at increments of 5°.
- ISO springs are used.

Working Force kN(tonf)	
Standard Working Force (one million strokes)	Allowable Working Force(300,000 strokes)
68.7 (7.0)	137.3 (14.0)

UCMSC80•150 Standard Type for Pierce

P.787~850

- Standard type with the mount width which is equal to the cam width.
- Automatic alignment mechanism of the V-shaped guide.
- Cam Slider is removable from the back side.
- Available angle is 0° to 70° at increments of 5°.

Mount width	Working Force kN(tonf)	
	Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
80	39.2 (4.0)	78.4 (8.0)
150	88.2 (9.0)	132.3 (13.5)

UCMSC50•65 Standard Type for Pierce

P.717~786

- Standard type with the mount width which is equal to the cam width.
Space saving design with reduced weight.
- Automatic alignment mechanism of the V-shaped guide.
- Cam Slider is removable from the back side.
- Available angle is 0° to 70° at increments of 5°.

Working Force kN(tonf)	
Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
19.6 (2.0)	39.2 (4.0)

UCMSF80•150 Reinforced Working Force Type for Pierce

P.787~850

- Standard type with the mount width which is equal to the cam width.
- Reinforced working force type of UCMSC (about 1.4 times)
- 2-stage spring type is used.
The spring force is about twice that of UCMSC.
- Automatic alignment mechanism of the V-shaped guide.
- Cam Slider is removable from the back side.
- Available angle is 0° to 70° at increments of 5°.

Mount width	Working Force kN(tonf)	
	Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
80	54.9 (5.6)	109.8 (11.2)
150	123.5 (12.6)	185.2 (18.9)

SOUK Standard Type for Pierce and Flange

P.851~944

- Highly rigid sliding structure of cam slider.
- Cam Slider is removable from the back side.
- Available angle is 0° to 70° at increments of 5°.
- 65,100 and 200 are available for the mount width.

SUWB Wide Type For Pierce and Flange

P.1007~1098

- 200, 300, 400, 500 and 600 are available for the mount width.
- Automatic alignment mechanism of the V-shaped guide.
- Cam Slider is removable from the back side.
- Available angle is 0° to 60° at increments of 10°.
(Angle up to 20° is increments of 5°.)

Mount Width	Working Force kN(tonf)	
	Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
200	117.6(12.0)	235.2(24.0)
300	196.0(20.0)	392.0(40.0)
400	245.0(25.0)	490.0(50.0)
500	313.6(32.0)	627.2(64.0)
600	392.0(40.0)	784.0(80.0)

UCNBK V-Shaped Guide for Pierce and Flange

P.945~1006

- Highly rigid sliding structure of cam slider.
- Automatic alignment mechanism of the V-shaped guide.
- Cam Slider is removable from the back side.
- Available angle is 0° to 70° at increments of 5°.
- 65,100 and 200 are available for the mount width.

* Although intermediate angle (5° type) product with the mount width of 100 and 200 is not shown, it can be manufactured.

UCMSG Long Life Type for Pierce and Flange

P.1099~1266

- Highly rigid structure with the overseas automotive approved.
- 50,65,80,150,200 and 300 are available for the mount width
- Cam Slider is removable from the back side (except width of 50 and 80).
- Available angle is 0° to 65° at increments of 5°.
- ISO springs are used.

Mount Width	Working Force kN(tonf)	
	Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
50	29.4(3.0)	58.8(6.0)
65		
80	49.0(5.0)	98.0(10.0)
150	147.0(15.0)	294.0(30.0)
200		
300	294.0(30.0)	588.0(60.0)

UCMSL Large and Long Life Type For Pierce and Flange

P.1267~1352

- 500 to 1000 at the increments of 100 mm are available for the mount width.
- Available angle is 0° to 60° at increments of 10°.

Mount Width	Working Force kN(tonf)
500・600	137.3(14.0)
700・800	470.4(48.0)
900・1000	627.2(64.0)

Types and Features of Die Mounted Cam Unit

CMSD Compact Type For Pierce

P.1555~1574

- 52 and 90 are available for the mount width.
- Easy to remove the cam slider.
- Available angle is 0° to 20° at increments of 5°. (Up to 15° for CMSD90)

Mount Width	Working Force kN(tonf)	
	Standard Working Force (one million strokes)	Allowable Working Force (300,000 strokes)
52	19.6 (2.0)	39.2 (4.0)
90	38.2 (3.9)	76.4 (7.8)

UCMSNR NAAMS standards for pierce and flange

P.1353~1486

- Product conforming to NAAMS standard.
- 70,80,165,200,300,400 are available for the mount width.
- Available angle is 0° to 60° at increments of 5°.
- Highly rigid structure with double wear plates and S45C material.

Mount Width	Working Force kN(tonf)
70	98.1(10.0)
80	166.7(17.0)
165	294.2(30.0)
200	353.0(36.0)
300・400	451.1(46.0)

SKC/SKCA Standard Type for Pierce and Flange

P.1575~1664

- 52, 65, 100, 150, 200, 250, 300, to 600 (at increments of 100 mm) are available for the mount width.
- Sliding type with highly rigid box guide.
- When the mount width is 65 to 150, the angle is 0° to 20° with increments of 5°. (0° only for the mount width of 52 and 200 or more.)

UCMSV VDI standard for pierce and flange

P.1487~1554

- 60, 85, 110, 165, 200, 250, 300 and 400 available for the mount width.
- Available angle is 0° to 75° at increments of 5°.
- Cam Slider(Spring) is removable from rear of cam.
- Product conforms to VDI standard.

KGSP Long Life Type For Pierce and Flange

☎ P.1665~1738

- Highly rigid structure with the overseas automobile manufacturer specification.
- 52,80,150,200 and 300 are available for the mount width.
- Available angle is 0° to 30° at increments of 5°.
- ISO springs are used.

Mount Width	Working Force kN(tonf)
50	14.7(1.5)
80	35.3(3.6)
150	117.6(12.0)
200	147.0(15.0)
300	294.0(30.0)

KCMSL Large and Long Life Type For Pierce and Flange

☎ P.1739~1722

- Highly rigid structure with the overseas automotive approved.
- Mount width of available standard parts is 500 to 1000 at increments of 100mm.
- Available angle is 0° to 20° at increments of 5°.

Mount Width	Working Force kN(tonf)
500・600	313.6(32.0)
700・800	470.4(48.0)
900・1000	627.2(64.0)

Special Die Mounted Cam Unit

WCMSh/WCMS Double Cam Unit Series

☎ P.1773~1788

- Since the cam is an aerial type, the overall design is made compact.
- Available angle is 0.0° to 10.0° at increments of 0.5°.
(The angle can be specified at increments of 0.1° from 1.6° to 3.9°.)
- If the working angle is changed, the cam shut height is constant.
- Two types with/without the guide cam holder are available.

CTCS/CTCH・CTVS/CTVH Thrust Cam Unit Series

☎ P.1789~1798

- Use of integrated rigid casting design
- The cam slider backup surface is reinforced for the highly rigid type.
- V guide design which does not apply reaction force to the cam slider surface
- Urethane is installed on the cam driver stopper for impact absorption.
- Mechanism to prevent unusual elevation of the cam slider is built in.

Available for large cam or dedicated cam to customer's specification.

In addition to standard cam units, customized cam units may be manufactured. Large cams or dedicated cams are products that can satisfy requirements of customers for module units on dies. Reduction of lead time, indirect costs, etc. contributes to die manufacturing of customers.

Large Cam

Cams which have conventionally been manufactured together with dies are separated into units. Dies are simplified and cam units are customized to order. Time for design and manufacturing can be reduced.

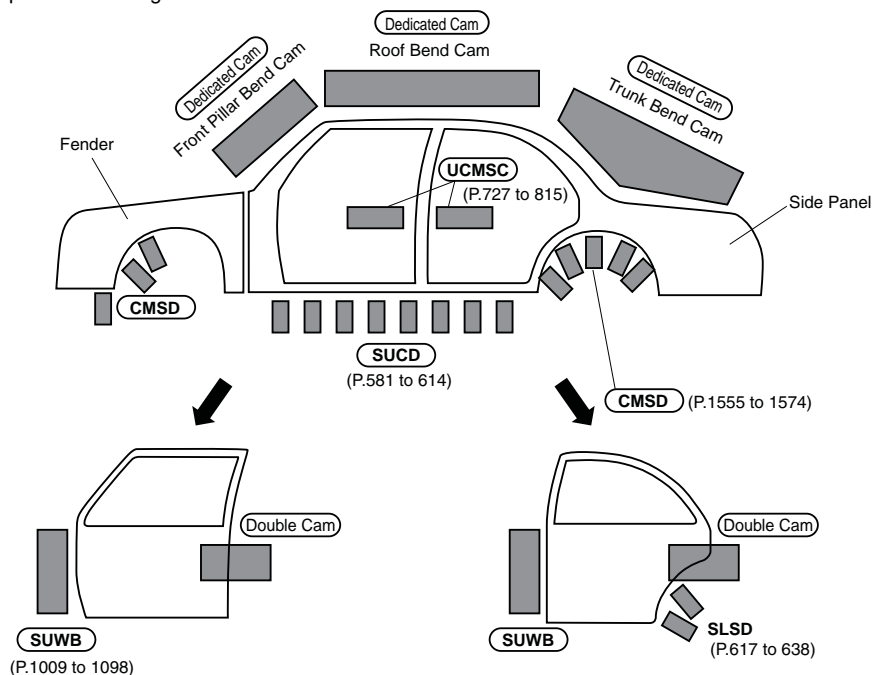

Dedicated Cam

The most appropriate cam in a large and heavy load operation or special shape area where a standard cam cannot be used is manufactured to customer's specification.

If the similar types of cams are continuously used, actions to manufacture products quickly or to keep stocks may be taken.

*Please ask sales representative for information or queries. Your requirements are satisfied by professional engineers.

Option code details

- SC : Mount surface protrusion length is changed.
- WC : Mount width is changed.
- K : It is changed to a key type. (Key is accompanied.)
- TK : It is changed to a T-shaped key type.
- FK : Key position is changed.
- N : Dowel pin hole is drilled.
- N12 : It is changed to #12 dowel pin hole.
- N13 : It is changed to #13 dowel pin hole.
- N16 : It is changed to #16 dowel pin hole.
- S : Bottom dead center lock type
- KA : It is changed to metric key with the width of 25.

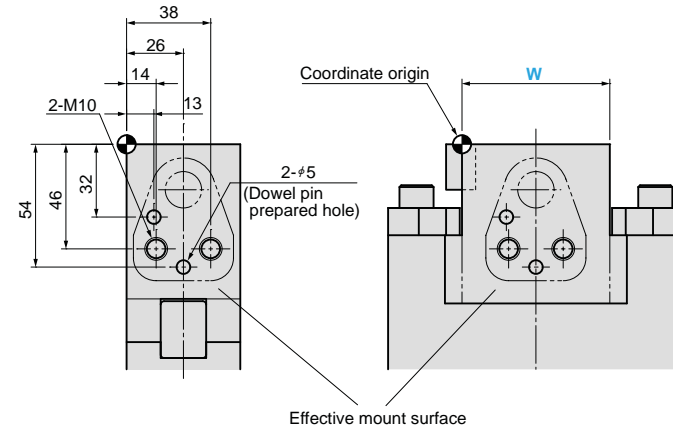

■ Tapped Hole and Dowel Pin Hole (Prepared Hole, Finish) Machining for Retainer Mounting

- Instruction method for machining
- Indicate the tapped hole diameter and the dowel pin hole (or prepared hole) diameter with the XY coordinates.
- To indicate the coordinates
 - The origin is positioned at the upper left corner of the mount surface.
 - Indication symbol
M...Tapped hole, K...Dowel pin prepared hole, N...Dowel pin finish hole
- Machining standard
 - Tapped holes and dowel pin prepared holes are machined to general tolerances.
 - Depth of both tapped holes and dowel pin holes (or prepared holes) is machined to the dimension 2.5 times the diameter.
 - The dowel pin hole spacing is machined to the tolerance of ± 0.02 . The hole tolerance is H7.

(Example of aerial cam)

(Example of die mounted cam unit)

Order

Catalog No.	(W)	(θ)	S	Option
CMSD	52	00	55	M10 - X(14.0) - Y(-46.0)
				M10 - X(38.0) - Y(-46.0)
				K5.0 - X(13.0) - Y(-32.0)
				K5.0 - X(26.0) - Y(-54.0)

■ Other machining

Please give instructions on a separate drawing for drilling or cutting other than tapped holes and dowel holes.

Order

Catalog No.	(W)	(θ)	Option
UCMSC	50	00	M10 - X(13.0) - Y(-51.0)
			M10 - X(37.0) - Y(-51.0)
			K5.0 - X(12.0) - Y(-37.0)
			K5.0 - X(25.0) - Y(-59.0)

■ Calculation Formula of Force Applied to Aerial Cam Unit

- θ_1 : Working angle
- θ_2 : Cam Angle
- F : Force Required for Working
(Working Force + Spring Return Force + Pad Force)
- P : Press force
- V : Load Applied to Cam Driver Surface
- Q : Load Applied to Cam Slider Surface
- S : Travel
- S' : Spring Travel
- L : Press Travel

● Cam diagram

- Press Force
$$P = F \cdot \frac{\cos \theta_2}{\sin(\theta_1 + \theta_2)}$$
- Load Applied to Cam Driver Surface
$$Q = F \cdot \frac{1}{\sin(\theta_1 + \theta_2)}$$
- Load Applied to Cam Slider Surface
$$V = F \cdot \frac{1}{\tan(\theta_1 + \theta_2)}$$
- Press Travel
$$L = S \cdot \frac{\sin(\theta_1 + \theta_2)}{\cos \theta_2}$$
- Spring Travel
$$S' = S \cdot \frac{\cos \theta_1}{\cos \theta_2}$$

■ Locating and Installation Procedure of Pierce Punch (retainer) in Aerial Cam Unit

- ① Drill the mounting holes and dowel pin holes (finish) on the die for the cam holder and the driver.
- ② Fix the cam holder and the driver on the die with bolts and dowel pins.
- ③ Set the cam slider removed from the cam holder on the fixed driver and locate the pierce punch (retainer).
- ④ Fix the pierce punch (retainer) on the cam holder.
- ⑤ Mount the cam slider on the cam holder fixed on the die.

Locating and installation are now completed.

■ Automatic Alignment Reproducibility of V Guide (Bottom Guide) Type

Automatic alignment means that clearance between the cam holder and the cam slider absorbs machining error for installation of the cam holder and the cam driver. The cam slider body is correctly located with the V guide structure of the driver and the cam slider. Therefore, the position of the pierce punch (retainer) is always reproduced.

■ Calculation Formula of Force Applied to Die Mounted Cam Unit

- θ : Working Angle
- θ_1 : Driver Inclination Angle
- F : Force Required for Working
(Working force + Spring Return Force + Pad Force)
- P : Press Force
- V : Load Applied to Cam Driver Surface
- Q : Load applied to Cam Slider Surface
- S : Working Travel
- L : Press Travel

Cam Diagram

- No Inclination of Working Angle (0°)

$$P = F \cdot \frac{1}{\tan \theta_1}$$

$$Q = F \cdot \frac{1}{\sin \theta_1}$$

$$V = F \cdot \frac{1}{\tan \theta_1}$$

$$L = S \cdot \tan \theta_1$$

- Inclination of Working Angle

$$P = F \cdot \frac{\cos \theta_1}{\sin(\theta_1 + \theta)}$$

$$Q = F \cdot \frac{1}{\sin(\theta_1 + \theta)}$$

$$V = F \cdot \frac{1}{\tan(\theta_1 + \theta)}$$

$$L = S \cdot \frac{\sin(\theta_1 + \theta)}{\cos \theta_1}$$
