## Dot For Decimal Point / Hour. Min. Second

※Run mode: hold the **RESET** key for over 3 sec, and it enters setting mode [dP].

※Setting mode: hold the **RESET** key for over 3 sec, and it saves the setting and returns to RUN mode.

If there is no **RESET** key input for 60 sec when entering setting mode, it returns to RUN mode.

### Changing the decimal point

※It returns to RUN mode if no **RESET** key or digital switch is applied for 60 sec in decimal point setting status.

## ■ Proper Usage

### Ⓞ DIP switch setting

Turn OFF the power before setting the DIP switch to the Counter/Timer.

After DIP switch setting when cutting off the power, press the front RESET key or supplying the external reset.

### Ⓞ Detaching DIP switch cover

※ Turn OFF the power before detaching the DIP switch cover.

Push and pull the groove of DIP switch cover with a flat head driver to the front. The cover is detached from the case.

▲ Be sure not to be wounded when using a tool.

### Ⓞ Error

Display	Error	Troubleshooting
Err0	Setting value is 0.	Change the setting value anything but 0.

※ If error occurs, the output turns OFF.

※ Indicator model does not have error display function.

### Ⓞ Power

① In case of 24VAC, 24-48VDC model, power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.

② The inner circuit voltage rises within 100ms after supplying the power to the unit. The input may be unavailable at this period. Be sure that the inner circuit voltage drops within 500ms after turning OFF the power.

③ Use the unit within the rated power supply.

When supplying or cutting the power, use a switch not to occur chattering.

### Ⓞ Input signal line

① Shorten the cable from the sensor to the unit.

② Use shield cable when input cable is longer.

③ Wire the input signal line separately from power line.

### Ⓞ Testing dielectric voltage or insulation resistance when the unit is installed at control panel

① Isolate the unit from the circuit of control panel.

② Short all terminals of the unit.

### Ⓞ Do not use the unit in the following environments.

① Environments with high vibration or shock.

② Environments with strong alkali or strong acid materials

③ Environments with exposure to direct sunlight

④ Near machinery which produces strong magnetic force or electric noise

### Ⓞ This product may be used in the following environments.

① Indoor

② Altitude max. 2,000m

③ Pollution degree 2

④ Installation category II
