

## Velomax Chain SW

### Lubricant for bicycle chains

#### Description

Velomax Chain SW is a water based wax dispersion that lubricate the bicycle chains and has water repellent properties.

Velomax Chain SW presents a non-ionic emulsifier system.

#### Applications

Velomax Chain SW is used to lubricate bicycle chains. It is recommended to apply the product undiluted on the dry and grease free bike chain. The product shows a tendency to separation during storage, therefore should be stirred before use.

#### Typical performance data

	Method	Velomax Chain SW
Colour	Visual	Yellow-brown
Active content, %	IR drier	41.0
pH	DIN ISO 976	8.7
Viscosity, mPa.s	DIN 53019	<27
