

## Formmax ZP

### Soluble concrete release agent

#### Description

Formmax ZP is a product formulated to give an easy and complete release of concrete form specially when using molds and forms of iron and wood. It can also be used if necessary to protect molds from oxidation.

#### Benefits

- Good release properties
- Operator friendly
- No dust on pieces
- High efficiency
- Economic
- Longer mold life

#### Applications

It is used diluted with water up to 400 ppm hardness in the proportion of 1 part of Formmax ZP and 9 parts of water. It can be applied by brush, roller or spray. The emulsion is prepared by adding Formmax ZP to water, not in the reverse order, and shaking slightly as it dissolves easily. To use against the oxidation of molds, do not mix Formmax ZP with water.

#### Typical performance data

	ZP
Appearance	Oily
Color	Amber
Emulsion color	White milky
Viscosity at 40 °C, cSt	110
