

Glassmax S 2015

Bacteriostatic synthetic lubricant for polishing, drilling and glass trimming

Description

Glassmax S 2015 is a special lubricating oil for drop glass sliding deflectors or funnels used in bottle manufacturing.

- High glass dust deposition properties
- Good edge lubrications

Applications

Honing, polishing and drilling of glass.

Storage

To be kept under cover. If packages are kept at the open air, rainwater or moisture will contaminate the product. Lubricating oils and greases should not be exposed to sunlight or at low temperatures (frost).

Benefits

- Easy to remove from the glassware

Typical performance data

PH @ 1%	9/10
Emulsion, %	0,3-1,5
Type of emulsion	Bacteriostatic
Base oil	Blend of synthetics
Additives	Esters and special lubricating agents
