Technical Data Sheet

Hydromax FR-WG 46

Fire resistant hydraulic fluid

Description

Water based solution of special glycols and anti-wear, antioxidant, and anticorrosive special additives package. Fluid according to ISO HFC class, suitable for wide range of hydraulic applications.

Benefits

- Outstanding fire resistance thanks to its high-water content (>40%)
- Excellent mechanical properties, protects the hydraulic pump against wear
- High anticorrosive and antioxidant characteristic, thanks to the high alkaline reserve
- Prevents the formation of oxidation
- Very shear stable
- Very high viscosity index: minimum viscosity temperature changes
- Compatible with normally used joints
- Low foaming tendency

Applications

Recommended for all systems suitable to run on water-glycol hydraulic fluids, i.e:

- Hydraulic operated furnace doors
- Die casting machines
- Welding machines
- Machinery for handling meld metals, cold rolling and hot glass machinery

Use conditions

- Maximum working temperature of 60
- Do not mix with different products.
 Prevent the contamination with foreign material because it can reduce the economical and technical lifetime

Page 1 of 1

 Follow the change periods recommended by the OEM

Typical performance data

| | FR-WG 46 |
|------------------------|----------|
| Density @ 20 °C, g/cm³ | 1.08 |
| Viscosity @ 40 °C, cSt | 46 |
| Viscosity Index | - |
| Pour Point, °C | -47 |
| pH | - |
