

## FDX 3020 Inox

### Cold forming oil

#### **Description**

FDX 3020 Inox is an oil specially formulated to lubricate cold forming applications.

It contains polar and extreme pressure (E.P.) to produce a product with the proper balancing characteristics.

#### **Application**

FDX 3020 Inox is suitable for stainless steel forming and severe drawing of all types of steel.

It is easy to eliminate with solvents or alkaline degreasers.

FDX 3020 Inox can be applied pure with a brush or a similar application device.

#### **Benefits**

- Avoids contact between piece and die
- Easy to apply
- Less defect in pieces
- Minimum wear in tools
- High film strength
- Better piece finishing

#### **Typical performance data**

Appearance	Brown liquid
Specific gravity @ 20 °C, gr/ml	1,08
Viscosity @ 40 °C, cSt	270
Flash point, °C	170
Copper corrosion	1b

All performance data on this Technical Data Sheet are indicative only and can vary during production
