

Matrix Anti Rust AG

Dewatering rust prevention fluid, greasy-oily film

Description

This product is a light fluid based on solvents and corrosion inhibitors with hydrofugant properties. The product is water repelling and displacing and will leave a light film with good anti-rust properties. Provides indoor protection up to 12 months.

Applications

Matrix Anti Rust AG can be used on all parts that have been treated with metalworking emulsions:

- Machined parts wet of grinding or soluble oils

- Parts quenched in water
- Parts or machinery that have been accidentally in touch with fluids
- Chemically worked parts
- Final protection for sheet steel and tubes

Advantages

- Excellent anti rust protection
- Prevents corrosion risks
- Preliminary drying of parts is not necessary
- Compatible with any type of metal

Typical performance data

Nature	Liquid with solvents
Colour	Amber
Density @ 20 °C, gr/cm ³	0,84
Flash point, °C	40
Salt spray test chamber, hours	50
Drying time	30 minutes

Use

Can be applied by brushing, dipping or spraying at room temperature. It is recommended that the product is stirred before use. Removal by solvents or alkaline degreaser.
