

DIMENSIONS:

Tire Type	Indication	Example
Pneumatic Tire	B-d	600-9
Low Profile Tire	DxB-d	21x8-9
D = Outside diameter		d = Inside (rim) diameter
		B = Maximum width

ALL-ROUND SOLUTIONS FOR YOUR INDUSTRIAL TIRE NEEDS

Excellent comfort with unbeatable performance

WHY TOKAI SOLID TIRE ?

- Outstanding performance
- High wear resistance
- Low heat build-up
- Excellence grip traction
- Maximum safety

THREE-LAYER COMPOUND

- Wear Resistant Tread Compound**
Formulated with premium NR for maximum abrasive strength, tear resistance and wear durability.
- Cushion Compound**
Formulated with premium NR to provide optimal shock absorption and low heat build-up over long distances.
- Base Compound**
A specially designed high tensile compound provides maximum hardness, exceptional stability and low deflection.
- Bead Wire**
Enhanced reinforcement and gripping of tire to the rim, for increased safety and stability.

ALL-ROUND SOLUTIONS FOR YOUR INDUSTRIAL TIRE NEEDS

TOKAI's product range was designed to deliver optimal performance, energy efficiency, comfort, durability and safety.

TOKAI is renowned for its dedication to quality and diverse product line.

ADVANCE TECHNOLOGY

TOKAI invests heavily in its research and development, using cutting-edge computer technology and over 15 years of acquired knowledge to develop new products. We use a finite element analysis (FEA) technique to study each tire's internal deformation under load, at variable speeds and during various working conditions.

COMPOUNDS

- Normal - premium natural rubber compound designed for optimum wear on diesel trucks
- Non-marking - available in white, extreme white and green
- Energy Max - for better energy efficiency on electric trucks
- Other special compounds available upon request

COST PER USE
