

BLIND TEMPERATURE CONTROLLER
MULTISPAN DTC 1X & DTC 1A

ENVIRONMENT CONDITION:

Operating Temp.	0 °C to 55 °C
Relative Humidity	UP to 95% RH (non-condensing)
Protection Level (As per request)	IP-65 (Front side) As per IS/IEC 60529 : 2001

MECHANICAL INSTALLATION

TECHNICAL SPECIFICATION

INPUT SPECIFICATION:

Input Types	Input	Range
	J	0 to 600 °C,
	K	0 to 1200 °C,
	PT-100	-99 to 400 °C,
	PT.1	-99.9 to 400.0 °C,
Resolution	J,K,PT-100 = 1 °C PT.1 = 0.1 °C	
Indication Accuracy	±1% of FSD ± 1 °C (FSD:- Full Scale Deflection)	

DIMENSION:

Size	76 (H) x 27 (W) x 116 (D) mm
------	------------------------------

CONTROL ACTION:

Heating	1) PID control 2) TP control 3) ON-OFF control
Cooling	ON-OFF control

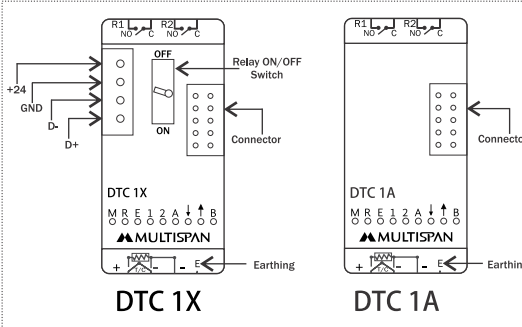

OUTPUT SPECIFICATION:

Relay Output	
Relay	2 Nos.
Relay Type	(NO-C)
Rating	5A, 230V AC / 28V DC

POWER SUPPLY:

Supply Voltage	24V DC
----------------	--------

TERMINAL CONNECTION

STATUS LED DESCRIPTION

- M ○ = Main LED:- It Will ON When power supply to the instrument
- R ○ = In DTC-1X There is a switch to On/Off Relay Output. If switch is on then relay RUN LED Will turn ON and Relay will ON-OFF as per its Control Output. If Switch is OFF then it will make Relay Output OFF.
- E ○ = Error LED Indication
- 1 ○ = Control Output of Relay 1
- 2 ○ = Control Output of Relay 2
- A ○ = PID Auto Tune Indication
- RX ○ = Receive of data Indication
- TX ○ = Transmit of data Indication
- B ○ = Sensor is Break Indication

POWER ON PATTERN

Explanation :
 This 3 LED is the indication of which input is selected in the instrument.

Input	0 0 0
0 0 0	J
0 0 1	K
0 1 0	PT - 100

Explanation :
 This LED will show Address value in binary format

Example :
 If address is 6 than its binary code becomes **0000110**. so LED will on/off as per its binary code

Explanation

Write function reg.	0 0 X 10	0 0 X 03	Data type	0 Sign Integer
1 0 X 06	1 0 X 04	1 Float		

Parity	0 0 None	Baudrate	0 0 0 2400 bps
0 1 Even		0 0 1 4800 bps	
1 0 Odd		0 1 0 9600 bps	
		0 1 1 19200 bps	
		0 1 1 38400 bps	

MAINTENANCE

- The equipment should be cleaned regularly to avoid blockage of ventilating parts.
- Clean the equipment with a clean soft cloth. Do not use isopropyl alcohol or any other cleaning agent.
- Fusible resistor must not be replaced by operator.

MECHANICAL INSTALLATION GUIDELINES

- To install the instrument on a DIN rail, raise the clamp at the back of the instrument and place it on the rail. Now release the clamp, so the instrument fits on the DIN rail.
- Ensure proper fitting of the instrument by pulling it outwards.
- To remove the instrument raise the clamp to release it from the DIN rail.
- The equipment in its installed state must not come in close proximity to any heating source, caustic vapors, oil steam, or other unwanted process byproducts.
- Do not connect anything to unused terminals.

INSTALLATION GUIDELINES

- Do not allow pieces of metal, wire clippings, or fine metallic fillings from installation to enter the product or else it may lead to a safety hazard that may in turn endanger life or cause electrical shock to the operator.
- Circuit breaker or mains switch must be installed between power source and supply terminal to facilitate power 'ON' or 'OFF' function. However this mains switch or circuit breaker must be installed at convenient place normally accessible to the operator.
- Use and store the instrument within the specified ambient temperature and humidity ranges as mentioned in this manual.

SAFETY PRECAUTION

All safety related codifications, symbols and instructions that appear in this operating manual or on the equipment must be strictly followed to ensure the safety of the operating personnel as well as the instrument.

If all the equipment is not handled in a manner specified by the manufacturer, it might impair the protection provided by the equipment.

Read complete instructions prior to installation and operation of the unit.

WARNING : Risk of electric shock.

WARNING GUIDELINES

- WARNING :** Risk of electric shock.
- To prevent the risk of electric shock, power supply to the equipment must be kept OFF while doing the wiring arrangement. Do not touch the terminals while power is being supplied.
 - To reduce electro magnetic interference, use wire with adequate rating and twists of the same of equal size shall be made with shortest connection.
 - Cable used for connection to power source, must have a cross section of 1mm or greater. These wires should have insulations capacity made of at least 1.5KV.
 - A better anti-noise effect can be expected by using standard power supply cable for the instrument.

MODBUS: DTC 1X & DTC 1A

Salve Address	1 to 127
Baudrate	2400,4800,9600,19200,38400 bps
