Products Specification Diagram

The sketch is only for simply description, product should be In kind prevail

Wipe dry the tableware then put into the disinfection cabinet.

Tableware that can not bear over 75°C, can not put inside this cabinet for disinfection.

Table ware that can not bear over 180°C only can put inside the upper cavity for disinfection and drying and must be keep a distance from the heating element at least 100 mm.

Tableware that can bear temperature from 180°C~250°C can put inside the lower cavity for high-temperature disinfection, but should keep a distance from the heating element at least 100 mm.

If your bowl or dish have interlayer, should not put into the lower cavity for disinfection. Because the interlayer have air, when high temperature heating, the air become too hot and your cook ware must cause uneven

When fix the disinfection cabinet, should keep a distance from the cookware, power cord, socket and other cooking heating area.

Caution

The socket must be with earth line, consumer can not change the plug, disinfection cabinet not allow to work without earth line.

The socket should be on the open area so that it is easy to unplug the power cord when clean the disinfection cabinet.

Wipe dry the tablewares before put into cabinet.

If there is unnormal noise, smelling, high temperature, smoke, unplug the power cord immediately and call the agent for after-sales service.

When doing maintaining, pull out the plug to make sure electricity is off.

If the power cord is damage, should call after-sales service to send the professional technician to replace.

After the disinfection cabinet finish sterilizing and drying, pull out the plug.

The durable time is 10 years (the date since you buy), if you have keep maintaining in good condition can be used till 15~20 years.

When the disinfection cabinet is working, don't touch glass or handle

Don't block the exhaust vent.

Don't fix the disinfection cabinet near inflammables. Don't put towel, clothes inside the disinfection cabinet, near or on top of the cabinet.
