Corrective SkinCare
BY SWISSFORCE

HOW POLLUTION AFFECTS OUR SKIN?

The skin is arguably the most efficient barrier we have to protect our internal organs. But since it's so soft and flexible, it's also the most vulnerable to external damage. Some of the harmful effects of air pollution on our skin include inflammatory and allergic skin conditions, such as psoriasis, eczema, acne or atopic dermatitis.

CLEAN

pH
5.4

**BALANCED & GENTLE
TO THE SKIN**

SWISSFORCE® PERFECT SKIN breaks into a foam to gently remove residue and traces of makeup and impurities, leaving skin feeling clean and soft. This cleanser soothes sensitive & stressed skin and purifies the skin without disturbing its protective function.

BALANCED CLEANSER

PURIFYING MORINGA SEED
ANTI WRINKLE SWEET IRIS
CALMING CALENDULA &
ALOE VERA

DIRECTIONS FOR USE: Spray a little amount onto your hand and apply with circular movements on your wet face, neck and décolleté. Rub in gently. Afterwards rinse with lukewarm water.

SWISSFORCE® PERFECT SKIN

Maintaining a healthy skin pH level will help with the following:

- Keeps the oil glands balanced
- Helps prevent acne
- Reduces inflammation in the skin
- Protects from free radical damage
- Helps heal blemishes more quickly
- Treats dry skin

Purisoft™ LS 9726 is an anti-pollution peptide from Moringa seeds that is clinically proven to protect and purify the skin from pollution.

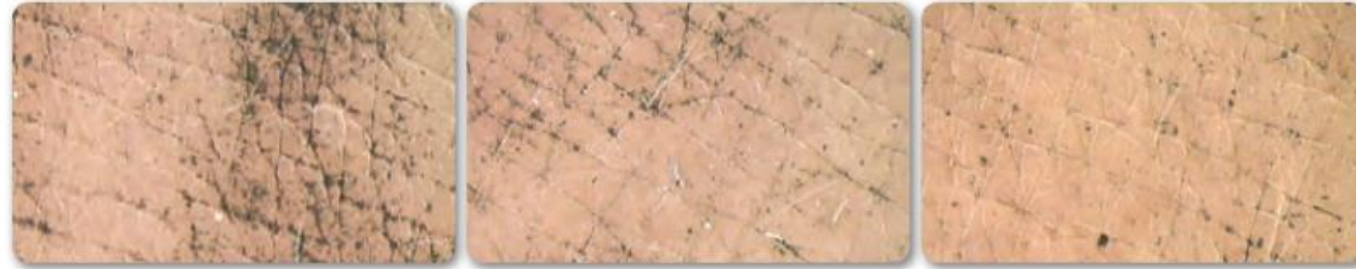

WITH MORINGA SEEDS

Videomicroscopy of the skin

1. After application of coal / protective effect against pollution

2. After rinsing with water / superficial purifying effect

3. After stripping / deep purifying effect

BALANCED & GENTLE TO THE SKIN

INSTANT FOAM CLEANSER
PURIFIES WITH MORINGA SEED
CALMS STRESSED SKIN WITH ALOE VERA AND CALENDULA
ANTI WRINKLE EFFECT WITH SWEET IRIS
FREE FROM PEGS, PARABENS, SILICONES, BHT
SUITABLE FOR ALL SKIN TYPES

WHAT CAUSES WRINKLES AND FINE LINES?

Aging skin loses both elasticity and moisture. This makes it more prone to wrinkles and fine lines, as it's less able to protect itself from damage. Another big factor is sun exposure, which is why we notice wrinkles first appearing on the most exposed areas: the face, neck, and back of the hands. Additional risk factors include smoking, the use of tanning beds, dehydration, certain medicine, and of course, genetics.

PREVENT

SWISSFORCE® WRINKLES

Refreshing primer to prevent wrinkles & fine lines with a premium fragrance developed by renowned perfumers in Grasse in the south of France.

ALL-IN-ONE SERUM

Sweet Iris Stem Cells, Encapsulated Retinol, Collagen Booster Liposom, Collagen fibrils, 2% Hyaluronic Acid of low and high molecular weight, Pentavitin, Betain, Encapsulated Swiss Glacier Water, Madecassoside, Snow Algae Powder.

DIRECTIONS FOR USE: apply two drops on a clean face morning and evening.

SWISSFORCE® WRINKLES

FIRMS 1

Instant tightening & lifting effect

DID YOU KNOW?

WHAT IS ROSACEA?

This common skin condition causes redness and accentuates the blood vessels in one's face, while also producing small red pus-filled bumps. The skin around the nose can thicken, and eyes might become irritated and dry. These symptoms can go on and off, and are sometimes similar to those of acne, psoriasis, or eczema. It's important to get a correct diagnosis from a medical professional, who can rule out other skin conditions.

Rosacea is a disease that develops differently in each patient. There are 4 different degrees of severity of rosacea. The symptoms, appearance and intensity of the disease can vary individually and therefore cannot always be clearly assigned to a certain subtype.

SUBTYPE 1

ERYTHEMATOTELANGIECTIC ROSACEA

Erythematotelangiectic rosacea is characterized by ascending and permanent redness, as well as the formation of visible veins. This is the most common subtype.

SUBTYPE 2

PAPULOPUSTULAR

Papulopustular rosacea is characterized by persistent redness with temporary papules and pustules. This subtype is often mistaken for acne, so that many people suffer from rosacea for years without knowing that it is rosacea.

SUBTYPE 3 PHYMATOUS ROSACEA

Phymatous rosacea is characterized by skin thickening, which leads to an enlargement of the nose from excess tissue. It causes irregular growths on the face, especially on the nose. It can also affect the cheeks, ears or chin.

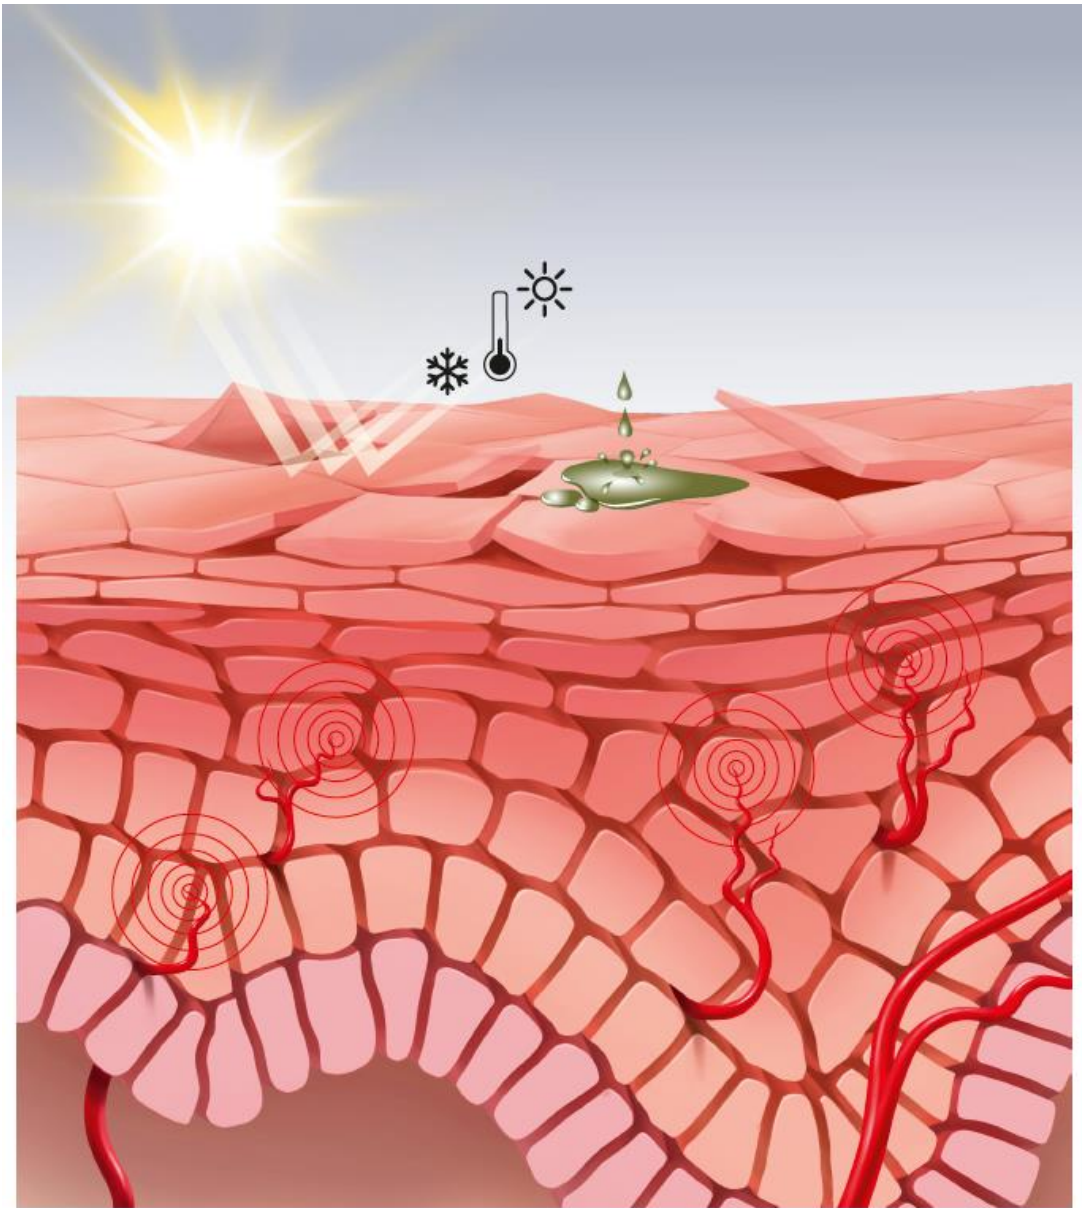

SUBTYPE 4 OCULAR ROSACEA

Ocular rosacea is characterized by ocular manifestations such as dry eyes, watering and burning, swollen eyelids, recurrent styosis and potential vision loss due to corneal damage.

A phytocomplex in a unique combination to regulate rosacea subtype 1 & 2. The effectiveness and patient safety are clinically tested.

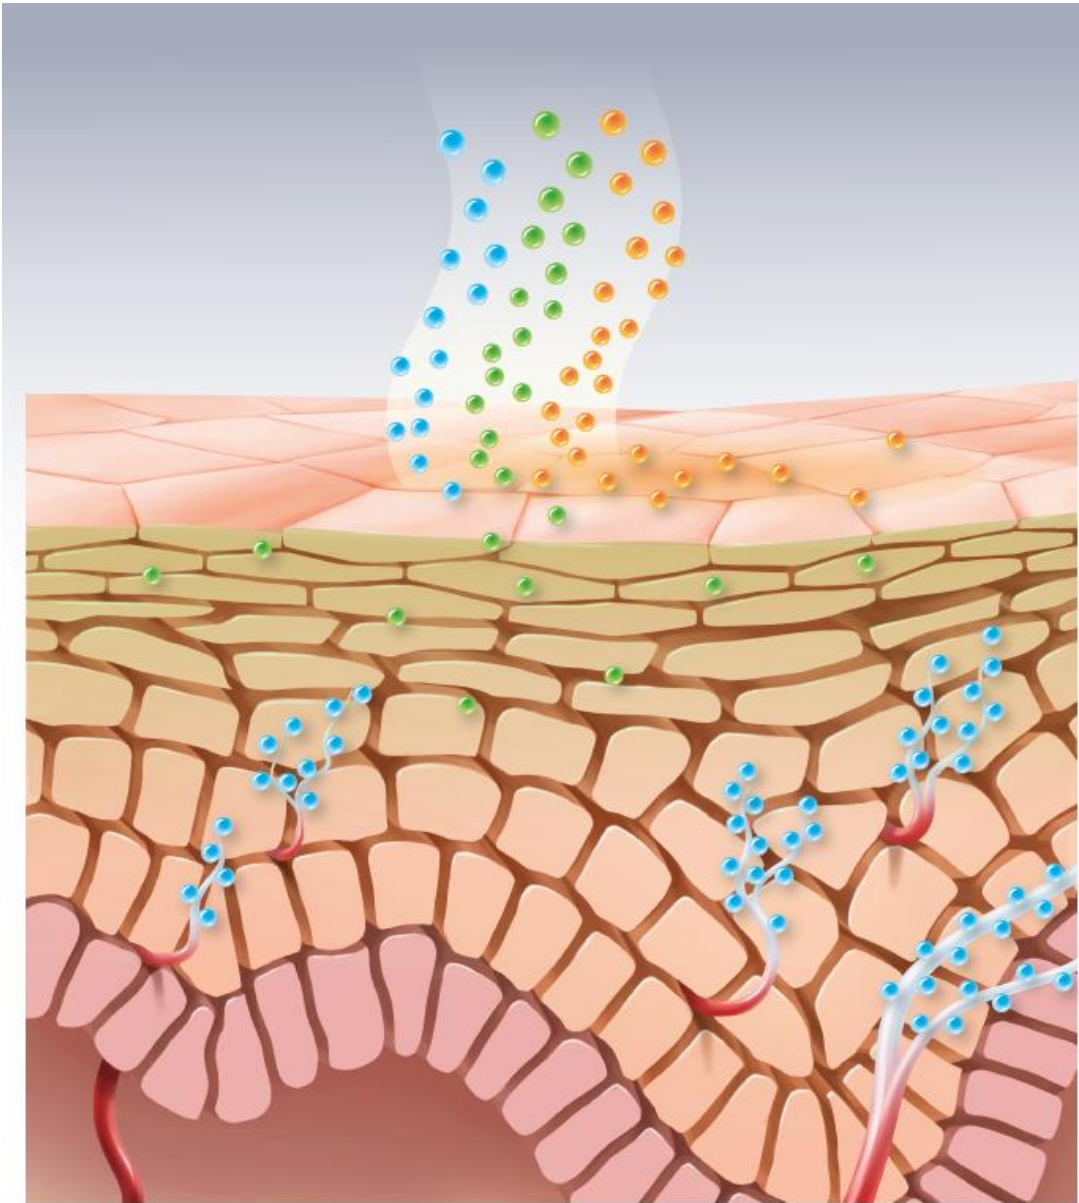

EXTERNAL (EXOGENOUS) FACTORS

- UV radiation

- Spicy food

PIGMENT-COMPLEX FOR BEAUTIFUL SKIN
COMPLEXION

SWISS CRESS AND PURPLE-RED ALGAE

SOOTHING-COMPLEX

CALENDULA AND ROSE

PHYTO-COMPLEX STABILIZES AND
STRENGTHENS BLOOD VESSELS

RED VINE LEAVES AND GINGKO

Niacinamide (vitamin B3) is a very stable vitamin which helps protect from UV and blue light damage. A study using a moisturiser containing niacinamide was shown to decrease blotchiness, flakiness, and bumps in rosacea subtype 2 patients after 4 weeks of use.

Rosehip oil contains polyphenols, anthocyanin and high levels of vitamin E and C which have anti-inflammatory properties.

Rosehip oil is also rich in vitamin A which is necessary to produce collagen. Recent studies have found a correlation between decreased collagen content and increased blood vessel size in rosacea patients.

EFFICACY OF SWISSFORCE® COUPEROSE ON VASCULARIZATION AND MICROCIRCULATION ON TARGET POPULATION STUDY UNDER DERMATOLOGICAL CONTROL

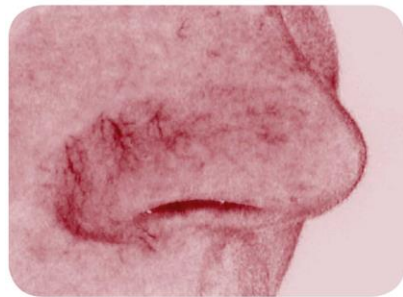

CLINICAL SCORING PERFORMED BY A DERMATOLOGIST
STUDIED POPULATION: 22 INCLUDED SUBJECTS.

GENDER: FEMALE

AGE: >35 YEARS OLD

SPECIFIC CRITERIA: ONLY SUBJECT WITH VISIBLE VEINS/THREAD VEINS AND REDNESS LINKED TO A ROSACEA SUBTYPE 1.

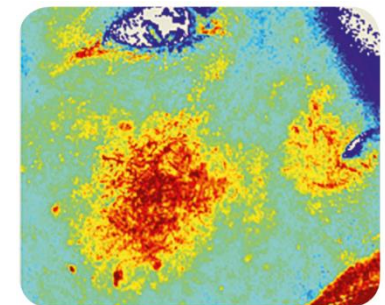

OBJECTIVE 1: Measure the effect on vascularization with VISIA® pictures before and after 7, 14 and 28 days

OBJECTIVE 2: Measure the effect on redness by measuring the microcirculation improvement with TIVI®

Microcirculation map

EXAMPLE OF SUBJECT N°13. THE SKIN BECOMES LESS RED, THREAD VEINS ARE LESS VISIBLE AND THE SKIN IS MORE UNIFIED.

TINTED DAILY MOISTURIZER
CALMS AND SOOTHES THE SKIN
PROVEN EFFECTIVE TO PREVENT
ROSACEA SUBTYPE 1
PLEASANT AND LIGHT FRAGRANCE
NON-GREASY
SUITABLE FOR ALL SKIN TYPES

REDNESS RELIEF BALM FOR TARGETED APPLICATION

CALMS AND SOOTHES THE SKIN
PROVEN EFFECTIVE TO MINIMIZE
ROSACEA SUBTYPE 1 & 2
PLEASANT AND LIGHT FRAGRANCE
NON-GREASY
SUITABLE FOR ALL SKIN TYPES

STEP 1: PREVENT REDNESS WITH SWISSFORCE® COUPEROSE

COUPEROSE is a tinted moisturising balm which can be used as daily moisturizer to prevent the appearance of redness. Apply all over the face morning and evening after cleansing.

STEP 2: REPAIR WITH SWISSFORCE® COUPEROSE FORTE

Designed for targeted use, we recommend to apply COUPEROSE FORTE morning and evening after using COUPEROSE to the affected areas.

During the day, apply additionally sufficient sun protection (UV Defense SPF 50+)

+

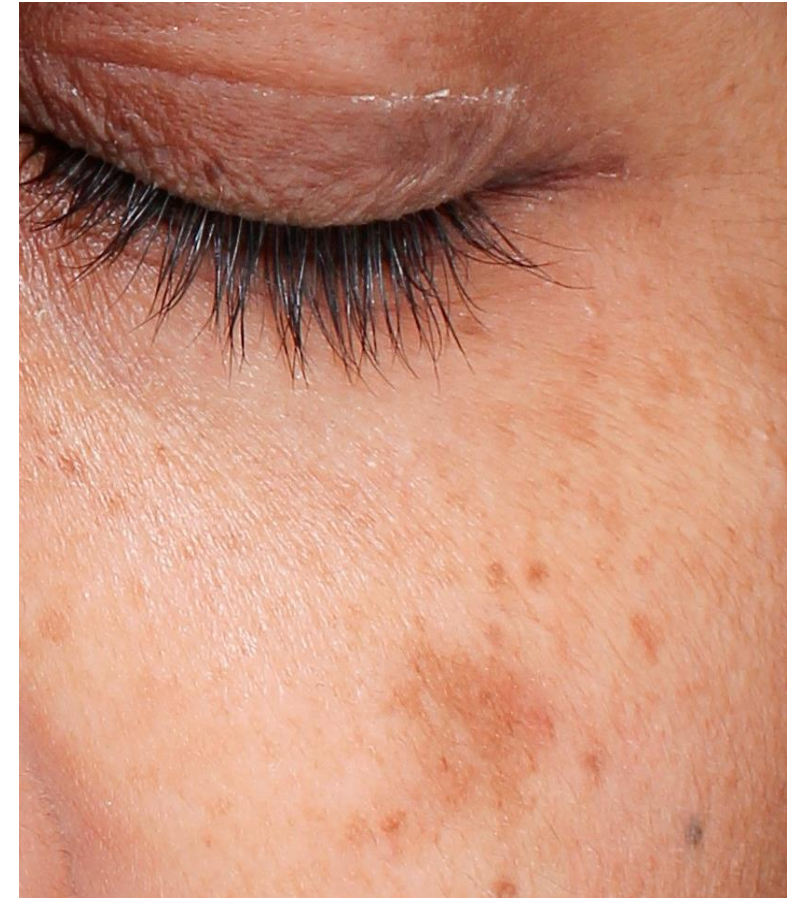

WHAT CAUSES HYPERPIGMENTATION?

Melanin is the pigment that gives skin its color. Excess production of melanin can lead to the appearance of hyperpigmentation.

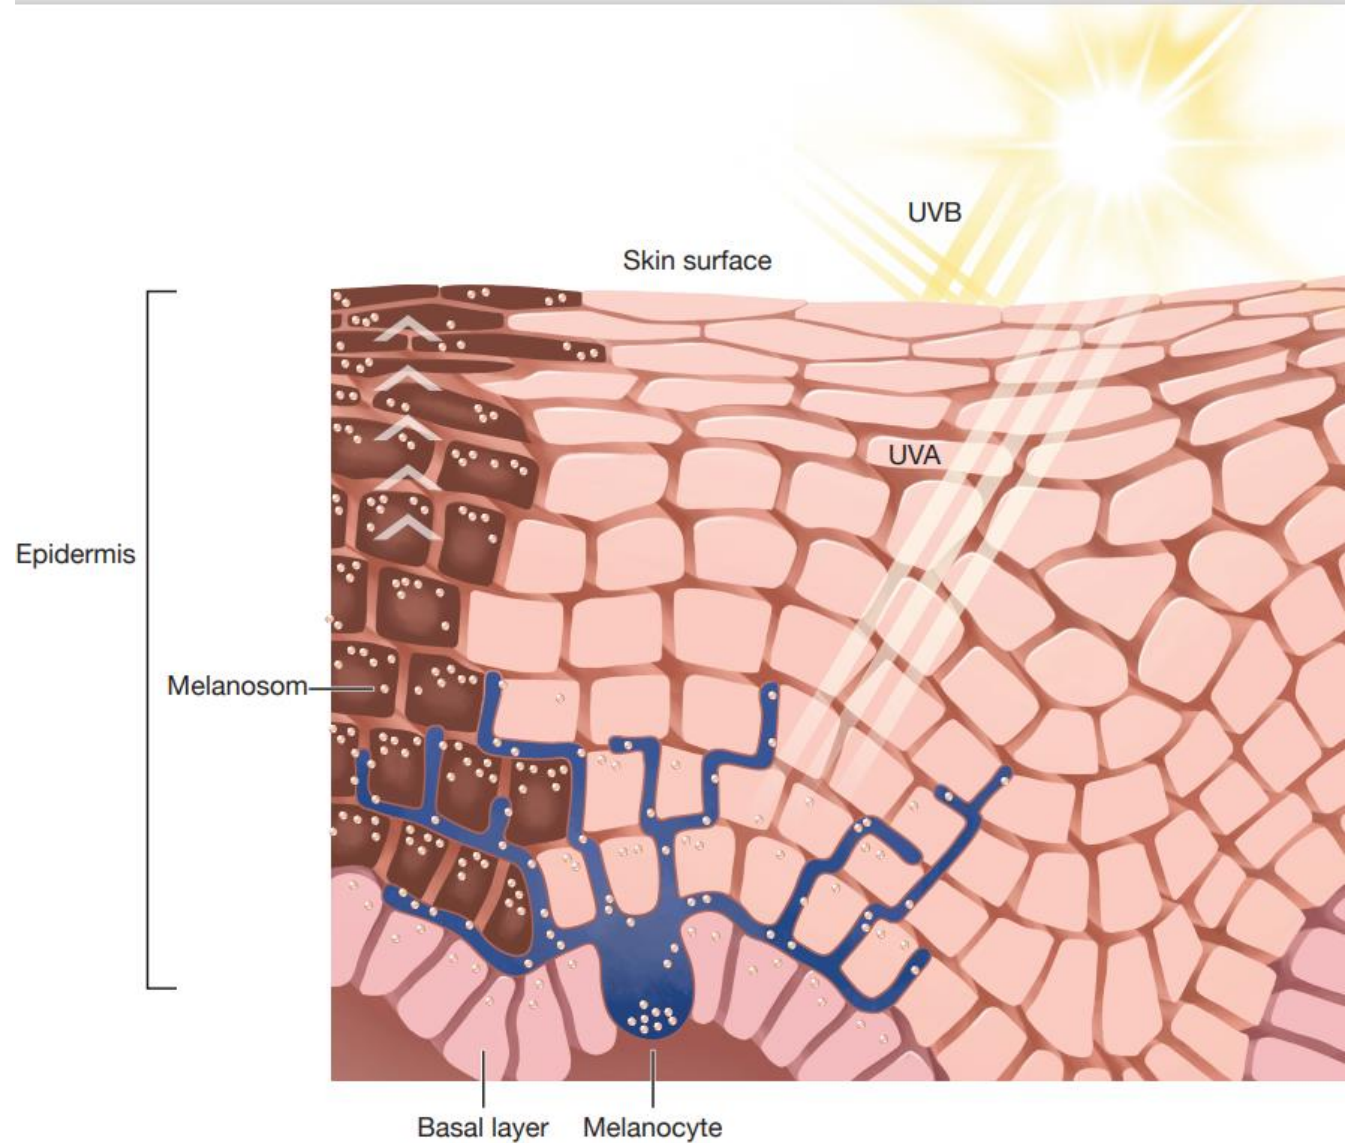

The main reason skin suffers from hyperpigmentation is sun exposure. You'll note that the most affected parts are those most exposed to sunlight. Hormonal changes can also affect the production of melanin of the skin, for example during pregnancy or when taking birth control. And while there are certain medications that can cause the skin to overproduce melatonin, it can also be a normal result of aging (hence the term "age spots").

Age spots also called solar lentigo can vary in size and usually appear on the face, hands, shoulders and arms-areas that receive the most sun exposure.

These brown spots are the result of excess production of melanin or skin pigment.

Melanin is produced by melanocytes in the basal layer of the epidermis and helps protect the skin against the damages of the sun.

An effective combination to
balance hyperpigmentation.
The effectiveness and patient
safety are clinically tested.

SWISSFORCE® AGE SPOT IS A PIGMENT CORRECTOR WITH

3% NIACINAMIDE (VITAMIN B3)

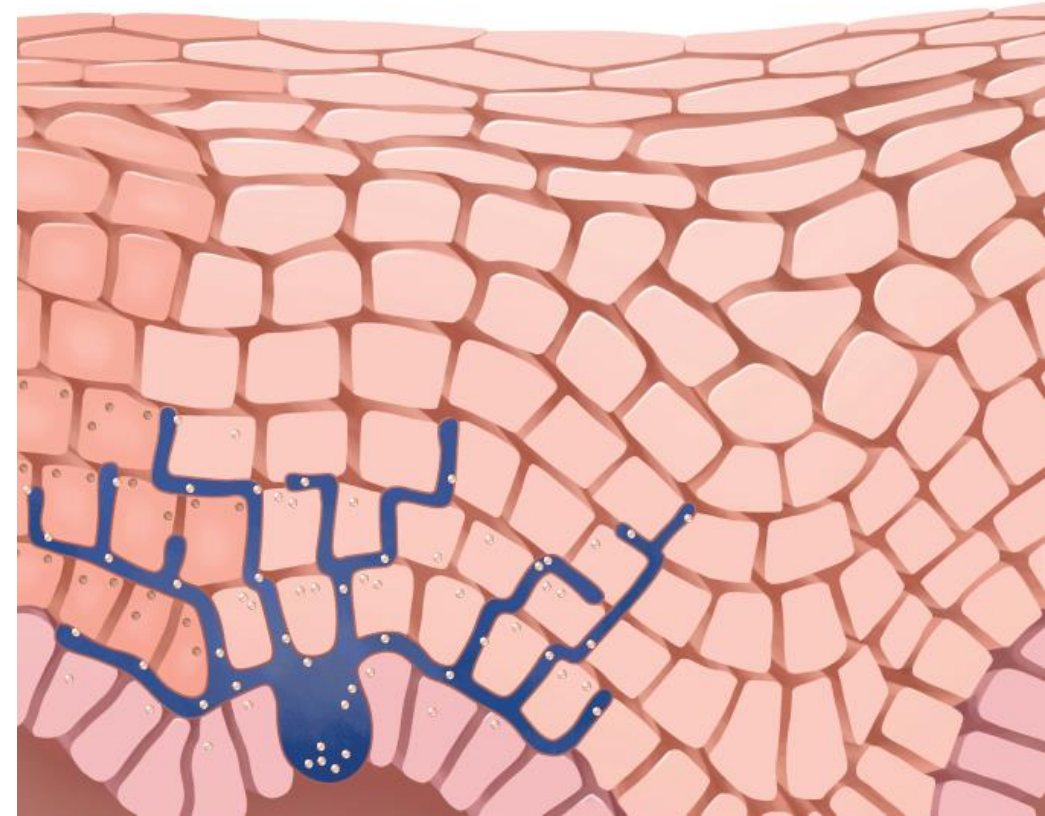

known for its moisturizing, skin barrier-strengthening and calming properties.

2% SULFORAWHITE (SWISS GARDEN CRESS SPROUTS)

Liposomal formulation of Swiss garden cress sprouts. Contains a rich source of Sulforaphane which effectively inhibits hyperpigmentation.

BERRIES COMPLEX

Black Mulberry, White Mulberry, Blueberry and Bearberry Extracts are rich in polyphenols with antioxidant effects.

SWISSFORCE® WRINKLES

STEP 3: PREVENT & REPAIR WITH
SWISSFORCE® AGE SPOT

STEP 4: PROTECT THE SKIN WITH
SWISSFORCE® UV DEFENSE SPF50+

DAILY ROUTINE FOR HYPERPIGMENTATION

THE WAY OUR SKIN LOOKS IS CLOSELY CONNECTED TO THE WAY WE'RE PERCEIVED. THESE ARE FEW TIPS WE CAN DO TO IMPROVE THE OVERALL ASPECT OF THE SKIN.

SPF PROTECTION. Good skin starts with good SPF protection. We recommend to protect the skin from the sun by using creams with SPF 30 or higher, wearing sunglasses, sunhats, and protective clothing.

MOISTURIZER. Using the right moisturizer for the skin type will help balance its natural oils, which in turn will lead to less skin problems such as acne or blemishes. Additionally, moisturized skin is less prone to wrinkles, and will generally look more youthful.

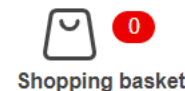

HYDRATION. The recommended amount of two liters of liquid a day ensures our organs function well. And the skin is, after all, our bigger organ.

DIET. A lot of skin issues start from what we eat. Consuming a varied diet, with plenty of fresh fruits and vegetables, fish, whole grains, and legumes will improve the quality of the skin.

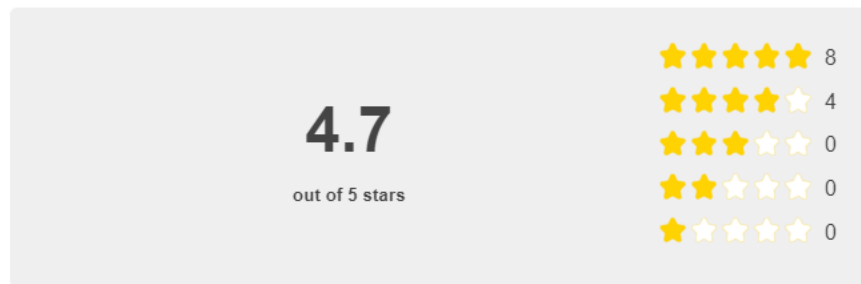

SLEEP. There's a reason why 'beauty sleep' became such a cliché: it's based on facts. Just like the rest of our bodies, the skin needs time to rest and regenerate. We should aim sleeping at least 8 hours a night, and avoid using screens a few hours before bed.

★★★★★ **Super great cream**

byImke P.am23.05.2022

Already at the first application I felt a pleasant feeling.... After a few days, my colleague asked.... what I did.... She said... I would look fresher... Redness and small veins decreased.... Have 2 tubes recreated.

★★★★★ **Very good product**

byGerlinde K.am16.02.2022

..... really helps! I am very satisfied!
