

## Honeywell

### R7259A1000 UV Flame Amplifier

Flame Amplifier, Ultraviolet, FFRT: 3.0 sec for R4150 or Q518/519

#### Overview

Solid state, plug-in units allow use of rectification, infrared and ultraviolet flame detections.

#### Features

Use with Q518, Q519 and W688A Flame Safeguard multi-burner modules and appropriate flame detector.

#### Product Specifications

Comments Color: Purple

Approvals, Underwriters Laboratories Inc. Listed: File No. MP268, Guide No. MCCZ2

Approvals, Canadian Standards Association Certified: File No. LR95329-3

Customer Special: N/S

Flame Failure Response Time (sec): 2 to 4 sec

Approvals, Control Safety Devices: N/S

Approvals, Swiss RE: N/S

Approvals, Factory Mutual: N/S

Self Checking: None (standard)

Use With Primary Safety Control: Q518, Q519, W688A

Use With Flame Sensor: Gas, oil, coal: Ultraviolet (Minipeeper) C7027, C7035
