Installation Instructions

Step 1 – Surface Preparation

**A** Clean up the surface from dirt or dust.

If the scheme coat of the wall is weak, chalking or peeling, we recommend to use the **Wall Sealer Pro** *(Page 26)*.

**B** Measure the dimesions of wall.

C Ensure your wall surface is non-wavy, dry, and solid.

If your surface is too wavy for the panels to be applied in flatly, a wooden frame can be built as a backing for the panels.
Step 2 – Layout Planning

A Plan the panel layout.

**B** Some panels may need to be trimmed to fit your wall dimensions.

C Sand the trimmed part with sand paper and touch up with Archistra paint (Included).

⚠ Ensure the whole part is coated & fully dried.

Step 3 – Panel Application

A Apply **construction adhesive** on the back of the panel and stick to the wall. Press and hold the panel a few seconds to ensure it is in place.

Recommended Adhesive Application

ACH 10 & 40 Series
ACH 20 Series

B Install the panels working from the bottom upwards. The use of a leveler is recommended.

Recommended Tools

Caulk Gun

Hand Brush

Leveler

Measuring Tape

Construction Adhesive

Saw

Paint Brush

Ruler
