PRODUCT SPECIFICATION

GRANDE SPEC

CUCKOO | 2023

Product Name	CUCKOO GRANDE
Types	Digital
Model	CP-AGN1010HW
Rated Voltage	Single Phase AC 220-240V / 50 HV
Power Consumption	Cold Water: 100 W / Hot: 450W / Extra Hot : 2,400W
Purification Method	Nano Positive Filtration System
Installation Area	For Indoor Use
Weight (Size)	18.5 kg
Dimension (mm)	260(W) X 527(D) X 506(H)mm
Operation Pressure	7 PSI ~ 40 PSI
Tank Capacity	Cold : 2.5L / Room : 2.7L / Hot : 2.4L
Water Temperature	Cold – (3 – 7 °C) Hot – (85 – 100°C)

FAQ

FREQUENT ASKED QUESTION

FREQUENT ASKED QUESTION

1. What is the difference between Hot Water Sterilization & Electrolysis.

A: Both effectively eliminate contaminants, but they utilize different approaches. Hot Water Sterilization employs the power of hot water, while Electrolysis generate Hypochlorous Acid (HOCl), an effective disinfecting agent that does not involve any chemical substances

2. What is the function of the Hot Water Temperature indicator on GRANDE?

A: Emits different color of light to indicate different temperature.

Temp. Indicator	50°C or less	50 ~ 65°C	65 ~ 80°C	80°C or higher
LED Color	SKY BLUE	YELLOW	PURPLE	RED

3. Why can't the hot water be dispensed at the moment?

A: When the tank temperature is low, a voice prompt will indicate, *"Tank is reheating, Please wait."*

If the tank temperature is lower than the selected hot water temperature, the hot water dispensing function is temporarily limited.

Alternatively, user may still dispense using Extra Hot Water or turn the dial to lower temperature for hot/lukewarm water.
