Auto Dosing Pump (ADU) **ADUCF01**

ADUCF01 is a single-channel intelligent enzyme dosing pump featuring both WiFi and Bluetooth control capabilities. This advanced unit enables the precise and automated dosing of CleanFlow Grease Trap Biomatic Enzyme and CleanFlow Grease Trap Biomatic Enzyme PRO into the grease trap. By doing so, it ensures the grease does not harden, emit unpleasant odors, or cause blockages in the pipes.

Furthermore, the ADUCF01 offers user-friendly remote control through a dedicated mobile app, providing real-time monitoring and adjustments to enzyme dosing schedules. This not only enhances operational efficiency but also contributes to maintaining a cleaner and more hygienic environment. Its smart technology ensures consistent performance and helps in reducing maintenance costs associated with grease trap management.

Products Highlight

- Plug and play
- Bluetooth Connection (iOS / Android)
- Operation Modes (Manual / Auto)
- Flow Calibration

Direction to use

- Setting 1 hour before business operation and 1 hour after business operation close

Recommended

Able use with
CleanFlow Biomatic Enzyme OR
CleanFlow Biomatic Enzyme PRO
