LONG-TERM CORROSION INHIBITOR

185g / 6 cans / Case

✓ Metal-seeking Vapor Corrosion Inhibitors (VCIs) seal and protect metals from the air and moisture that can cause rust. VCIs continue to work, even if some of the sprayed surface gets rubbed off, re-sealing the vulnerable surface.

✓ 金属气相防锈膜可以密封并保护金属，防止其受到湿气的影响而生锈。喷涂过的表面即便有部分擦去，气相防锈膜仍可以持续发挥作用，重新密封易受影响的表面。

✓ Mengandung Vapor Corrosion Inhibitors (VCIs) yang bersifat tertarik kepada logam, ia berfungsi untuk menutupi dan melindungi logam dari udara dan kelembapan yang boleh mengakibatkan karat. VCIs masih berkesan walaupun sebahagian permukaan yang disemur tergosok kerana permukaan yang terdedah akan ditutup semula.

✓ NSF Category : A7 ✓ NSF Number : 146726

Recommended Uses

- Long-lasting protection
- Protective coating for metals
- Blocks rust & corrosion
- Ideal to use on equipment before storing
- 长效保护
- 形成金属的保护层
- 防止生锈和腐蚀
- 适用于准备储藏的器具
- Perlindungan yang berpanjangan
- Lapisan Pelindung untuk logam
- Mencegah karat dan hakisan
- Sesuai diguna atas peralatan sebelum disimpan

Corrosion Protection

The test and what it means: ASTM B-117 is used to measure the level of corrosion protection provided by a test fluid under extreme conditions. Steel panels are treated with the test fluid and are allowed to drain for 2 hours, then placed in the salt spray cabinet that contains a fog of 5% salt (NaCl) solution. Even after 1200 hours of exposure to the harsh environments, WD-40 SPECIALIST Long-Term Corrosion Inhibitor helps prevent corrosion when compared to untreated metal.

Perfect for protecting equipment like snow blowers, mowers, boats & trailers before placing in seasonal storage.

*Protects against corrosion for one year outdoors & two years indoors.
