CASALAM HPL PORTFOLIO

C A S A L A M

“

CASALAM is committed to the research, development, production, and supply of high-pressure decorative materials. We adhere to the brand philosophy of quality, innovation, and environmental protection. Upholding the principles of “quality first” and “customer first”, we focus on the design and R&D of decorative materials, providing users with high-quality products and professional solutions, while creating unique and outstanding results.

HIGH PRESSURE LAMINATE (HPL) have more than 100 years history evolving from early experiments with resins paper high pressure to the versatile. Today, HPL is a popular choice for both residential and commercial spaces due to its durability stylish ease of maintenance, and wide range of designs and finishes.

TECHNICAL DETAIL

Generally, HPL laminate require approximately 10 Mpa of pressure and approximately 135°C (or more) of heat, which will vary from one product to another.

GENERAL USE & CARE GUIDE

General tips

- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 60 degrees Celsius may cause damage to the laminate surface.
- Do not use the laminate for purposes that it is not intended for. (E.g. do not iron, chop, hammer or expose the laminate to open flame.)
- Laminates are suitable for indoor use only. Outdoor application with exposure to direct sunlight and weather conditions are not recommended.
- UV rays may alter the colour of the laminate.

Cleaning

- Cleaning should be done with water and a clean, non-abrasive cloth.
- Use mild household cleansers or detergents to gently wipe down.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solutions as these may damage the surface of the laminate.

This is the place of return,
the starting point, a quiet
peace unspoken yet understood

CASALAM — Where the heart finds home.
