Safety in Every **SUMMER**

SUMMER

We are **No. 1 in Solar Hot Water Heaters**

45 years ago, SUMMER pioneered solar water heating in Malaysia. Decades later, SUMMER remains a trusted name, found in homes across the country, solidifying its reputation as the Number 1 Solar Hot Water System in the region.

With international recognition from testing bodies, SUMMER is a quality-assured solar hot water system and a true industry pioneer. Decades of research and development have gone into refining its features and performance, making it the reliable system it is today.

Designed for Sustainability

- SUMMER is built to last, using top-grade, quality-assured materials like corrosion-resistant stainless steel, aluminium, and copper.

Warranty

- SUMMER offers a 10-year domestic and 5-year international warranty, supported by our exceptional service team.

Trusted by Many

- SUMMER's reputable Systems are trusted by our diverse clientele, from residential homeowners to large-scale commercial enterprises.

Sterling Reliability

- SUMMER's strict Quality Control process selects only the highest quality brass fittings and components.

Customizable Hot Water

- SUMMER's hot water systems, scalable from 180L to 450L, provide round-the-clock hot water for your home.

We Strive for The Best

We are **Reliably Renewable**

For over 45 years, SUMMER has been delivering carbon and energy savings through advanced hot water technologies—long before the global shift toward energy conservation.

The SUMMER Solar Hot Water System was developed with a clear goal: to reduce electricity consumption. Manufactured from 100% recyclable materials, it ensures minimal waste while contributing to a greener future.

The average household consumes approximately 1,000 kWh of energy per year for hot water—accounting for 15% of the electricity bill, or up to 30% if space heating is needed. With SUMMER, you can save up to 95% of this energy, meaning your investment pays for itself within just three years.
