Company Profile

When your line stops, we get it moving again.

Independent MRO spare-parts sourcing · Since 2002
Obsolete, discontinued & hard-to-find industrial components
Kuala Lumpur, Malaysia · Nationwide delivery

WHO WE ARE

L-Tech Automation Sdn Bhd is an independent MRO spare-parts sourcing specialist based in Cheras, Kuala Lumpur. When a factory has a machine down, we find the replacement part and get it moving — fast, and without being tied to any single manufacturer. Since 2002 we have helped more than 150 factories across Malaysia cut downtime by sourcing the components they can't get quickly anywhere else.

OUR STORY

We started in 2002 as a small trading house supplying industrial printer components. Working alongside factories, we kept running into the same problem: when a critical part failed, plants were stuck with long lead times and restrictive, single-manufacturer supply channels — while the line sat idle and the losses added up by the hour.

So we changed what we did. We went independent and brand-agnostic, and built the supplier network and sourcing know-how to track down almost any industrial component — current, obsolete, or hard-to-find — and get it to the customer as fast as possible. In 2004 the business was incorporated as L-Tech Automation Sdn Bhd.

That shift is still the heart of the business today. We source and supply industrial spare parts for factories across Malaysia, handling part requests every day — from routine replacements to components the original manufacturer stopped making years ago.

not for a manufacturer's catalogue.”***

THE PROBLEM WE SOLVE

Unplanned downtime puts two teams under pressure at once. Maintenance needs the line running again — every hour down is measurable loss. Purchasing needs to move fast while still answering for cost, correctness and supplier reliability.

The default answer — order through the OEM channel and wait — can mean weeks of lead time the plant can't afford. Sourcing elsewhere carries its own risks: wrong or incompatible parts, unverified sellers, and suppliers who go quiet once the purchase order is issued.

L-Tech exists to close that gap. We confirm the exact part before supply, tell you clearly whether you're getting genuine or a verified equivalent, give realistic lead times up front, and follow up until the part is delivered — so the engineer gets the line back, and the buyer has a supplier who answers for the outcome.

WHY FACTORIES CHOOSE US

Independent

We source from wherever's fastest, not from one locked-in channel.

Hard-to-find is our speciality

Obsolete and discontinued parts others can't locate.

Follow-through

We stay on the order until the part is delivered and confirmed — we don't disappear after the quotation.

Fast when it counts

The whole business is built around minimising your downtime.

Straight answers

What's genuine, what's a verified equivalent, and how long it'll take — before you commit.

Alongside your team

Keep your in-house maintenance; use us for sourcing, obsolete items and urgent breakdown support.

WHAT WE SOURCE

We source and supply industrial spare parts across all major automation and machinery brands — current production items as well as obsolete, discontinued and end-of-life components. Where the OEM part is available, we supply genuine; where it isn't, we can propose a verified equivalent, and we always tell you which one you're getting before you commit.

Component types

- PLCs and HMIs
- Sensors and encoders
- Servo systems, drives and inverters
- Relays and contactors
- Control and pneumatic components
- Industrial electrical items
- Machine replacement parts
- Instrumentation and metering

Brands we work with most often

Allen-Bradley (Rockwell Automation) · Schneider Electric · Mitsubishi Electric · Bosch Rexroth · Bernstein
...among many others. Being brand-independent, the list above is not the limit of what we source — if your machine needs it, ask.

INDUSTRIES SERVED

- Automotive & components
- Electronics & semiconductor
- Food & beverage manufacturing
- Furniture & woodworking
- Glove manufacturing
- Healthcare & medical manufacturing
- HVAC & refrigeration
- Industrial automation & manufacturing
- Printing & packaging
- Retail fixtures & commercial interiors
- Rubber & polymer manufacturing
- Steel & metal fabrication

WARRANTY

Genuine OEM parts carry the manufacturer's warranty. Sourced and equivalent items are covered per the terms confirmed at quotation — stated clearly before you commit.

HOW TO WORK WITH US

- 1 Send the details**
WhatsApp us the part number, a photo of the machine nameplate or the faulty part, and any specifications you have.
- 2 Tell us the urgency**
Machine down now, or planned maintenance? It changes how we source.
- 3 Get sourcing options**
We come back with availability, genuine/equivalent options, realistic lead time and pricing.
- 4 Part delivered — and followed up**
We stay on the order until the part reaches you and is confirmed working.

DELIVERY & COVERAGE

Klang Valley

Same-day turnaround is common for parts held locally.

Nationwide (Malaysia)

Delivery throughout Malaysia; typically around 2 additional working days outside the Klang Valley.

Imported / specially sourced

Typically within 4 working days, delivered to your door. Realistic lead times confirmed up front.

Overseas sourcing & customs

For parts unavailable in Malaysia, we source and import from overseas suppliers — including handling customs clearance — so a hard-to-find foreign component still reaches your floor.

BEYOND SUPPLY

Many of our customers keep an in-house maintenance team and use us for what we are fastest at: spare-part sourcing, obsolete and hard-to-find items, urgent breakdown support and part stocking. Depending on the issue and location, we can also provide onsite technical support and troubleshooting alongside supplying the part.

Machine down, or planning?

Send us the part number and we'll take it from there.
