

Time is free, but it's priceless

AC100C Fingerprint Time & Attendance System

We present to you the latest in the AC100 series: FingerTec AC100C! This model is a step above the previous FingerTec's AC100 for it now has additional features such as a full colour screen, configuration icons and USB data management. The AC100C was designed for cost-effectiveness, so that smaller companies or those with a lower budget set aside for security and time management systems can still have FingerTec solutions implemented in their workplace. The AC100C has an amazing capacity for fingerprint templates and transaction records, plus it can be synchronized with the Time Control & Management System (TCMS) for easier data management. Basically, the AC100C was designed to give you practicality at a lesser cost.

Easy Data Management

All you need is a USB flash disk to transfer transaction logs to your computer. It is that easy!

Supersized Capacity

Get up to 10000 fingerprint templates and 200000 transaction logs – more than enough to fulfill the requirements of an SME.

Full Colour Screen

Treat your eyes to the new colour display on the AC100C. The screen is now bigger, better, and clearer.

User Friendly

The AC100C has icons that function especially for configuration which gives the whole device a more user-friendly feel.

Value for Money

This model was designed to be economical so that you are able to implement FingerTec solutions at a lower cost. We believe that when it comes to security, there should be no compromise.

Precise Recognition

The AC100C uses minutiae matching technology that ensures only enrolled users are granted access.

Manage Your Data Easily

Administration is easy with the bundled software! FingerTec's TCMS software allows you to generate reports, monitor attendance and integrate FingerTec with a third party system

Eliminate Buddy Punching

The weakness with the clock-in card system is that 'buddy punching' can occur where one employee can clock in the time for another employee if any of them are late. Eliminate this occurrence by using the unique perindividual fingerprint as a clock-in card!
