A quick start to protecting your home

The StarterKit is the core of the Ajax wireless security system. Adding additional devices to turns it into a universal security system that can protect against intrusion, fire and flooding.

The Ajax StarterKit is professional level quality that blends beautiful design with an simple-to-use interface that will keep any user at ease.

Connects to a central monitoring station

Battery life of detectors up to 7 years

I - 2000 - I
M

Works at a distance of up to 2,000 m

Controlled with your smartphone

The StarterKit includes

Hub	MotionProtect	DoorProtect	SpaceControl
CONTROL PANEL	**MOTION DETECTOR**	**OPENING DETECTOR**	**SMART KEY FOB**
Two-way radiotechnology, internal Ethernet and GSM communication modules	Detects the first step of an intruder, but does not react to cats or dogs	Protects against break-ins through windows or doors	Enables/disables modes of protection; equipped with a panic button

Protection against failures and sabotage

Blackouts

The system reports power failures and continues working from the backup battery

Internet Issues

A backup GSM signal sends notifications in the event of a network failure

Detector Failure

Frequent pinging ensures an alert is sent as soon as a device stops responding

Damaged Sensor

Frequent pinging instantly determines damage

Server Unavailable

An alert is sent instantly

Hacking Attempts

All data is heavily encrypted to ensure safety

Jammed Radio Channel

The system notifies users and monitoring stations of jamming and switches to a clean frequency

Open Detectors

All devices are tamper proof; an instant alarm is sent when the cover is removed
