Expandable Security Systems

paradox.com

Spectra SP's user-friendliness and unique feature set make it the best security system in its class.

STAY D™

Go with simpler and safer living. The revolutionary StayD feature represents a completely reversed philosophy that resolves all issues with any security system made today. A StayD system is always armed and only partly disarmed when entering or exiting a site, which is the opposite of a common security system that's always disarmed and needs to be armed to provide protection.

Cell Phone Notification

Go cellular. In the case of an emergency your system will immediately contact you on up to 5 different telephone numbers. Use your phone to arm and disarm your system, open a garage door, turn on your lights and even verify your system status.

Internet Access

Go high-tech and receive notifications by e-mail. For example, get a message as soon as your kids get home from school. Also, arm/disarm and monitor your security system through a web browser from anywhere in the world.

Remote and Wireless Convenience

With one-touch, remote control convenience, using your security system has never been simpler. Disarm your system with one button, arm it with another, or send a panic signal to your monitoring station.
Three Arming Levels

Spectra SP protects your home, but more importantly, Spectra SP protects you.
Get three different levels of security:
• Arm: Leave your home and maximize your security.
• Sleep: Protect your main floor while you sleep in full security upstairs.
• Stay: Protect your perimeter while at home with the children.

Expandability

Get up to 32 points of detection for maximum security. Start small and expand your security as your needs grow. Three models are available depending on your initial requirements: SP5500 (5 zones), SP6000 (8 zones) and SP7000 (16 zones). Also, get protection for two independent areas at one location. Secure your house, as well as your basement apartment, and control both distinct areas conveniently from one keypad.
