

# RG-TFB306-M

Swing Gate Turnstile (Mid)

**RANGER**  
AUTOMATION · REVOLUTION

RG-TFB306-M is a direction indicator, showed that pedestrian access to the current status of, & guide pedestrians correct and smooth passage/

RG-TFB306-M utilize auto-reset function, if no passing during identified card-reading time, the system will reset automatically the passengers are prohibited to pass until their second identified reading.

With voice & strobe light alerts

Double anti-clipping function

Use Various type of cards & Bar code to achieve access

Can set delay closing in 1-60s

## Technical Data

| Unit Model          | RG-TFB306                           |
|---------------------|-------------------------------------|
| Dimension           | 1400*185*1020mm                     |
| Unlock Time         | 0.2s                                |
| Passage Width       | ≤900mm                              |
| Throughput Rate     | 35p/m                               |
| Power Supply        | 100~240V                            |
| Max Power Consump   | 35W                                 |
| Accessible          | IC/ID card, bar code & magnet cards |
| Motor Voltage       | 24V                                 |
| Working Temperature | -25~70°C                            |
| Anti-clipping       | Double ( Photocell & Mechanical )   |
| Net Weight          | 95KG                                |
