

RG-TFH538/316

Full Height Turnstile

RANGER
AUTOMATION • REVOLUTION

RG-TFH538/316 is designed to provide unsupervised access control & high security facilities. Impenetrable construction virtually eliminates any unauthorized entry to restricted areas.

RG-TFH538/316 rigid welded stainless steel construction of the full height motor turnstiles offers advanced reliability & vandal resistance. This model also manufactured in stainless steel motor & is available in either four section (90 degree) or three section (120 degree) version.

Designed not to Lock at 45 Degree

Programmable Selections

Use Various Type of Cards & Bar Code to Achieve Access

Modular Plug-in Electronics Easy & Quick Repair

Technical Data

Unit Model	RG-TFH538	
Passage Width	≤ 650mm	
Unlock Time	0.2s	
Pass Rate	30p/m	
Input	100~240V	
Motor Voltage	24V	
Power Consumption	30W	
Net Weight Including Bars	95KG	
Dimension	1400*1200*2310mm	
Relock	Auto, if no action detected	
Remote Control	Cable	Wireless
Accessible	Identification	Access control system
Anti Backup Device	Prevents reverse after moved 30 degree	
Power Failure Option	Locked or unlocked during power fail	
Working Temperature	-25°C~+70°C	

Dimension(mm)
