

MP7G3 PIN Access Control

MP7G3BL PIN Access Control System is quick and easy to install, simple to manage and is a cost effective means of controlling access to a building. The system integrated the control unit, and keypad into one robust unit which is then connected to a power supply, exit button and electric lock. It is Single User PIN mode or Multiple User PIN mode programmable.

MP7G3BL PIN Access Control System can be installed to many doors over a site, all using the same User PIN. MP7G3BL is a perfect system for normal entry points such as residential areas, office premises and commercial centres.

Access Control Features:

- Over 100 million code combinations
- Door lock inhibit authorization
- Easy integration with different types of door lock system
- All features are keypad programmable
